HMIS Data Standards
DATA DICTIONARY

Released August, 2016

U.S. Department of Housing and Urban Development

Version 5.1

Contents

SUMMARY OF CHANGES

Version 5

Element Number	Element Name	Change Requirement
2.3	Continuum of Care Code	Updated guidance

Element Number	Element Name	Change Requirement
3.6	Gender	Wording change
3.8	Disabling Condition	Universe change – collect for all clients
3.917	Living Situation	Structural and wording change (Major change)
4.2	Income and Sources	Collection change – collection now includes PATH
4.3	Non-Cash Benefits	Collection change – collection now includes PATH
4.4	Health Insurance	New Response options added
4.14 A	Services Provided: PATH Funded	Response options changed
4.16A	Referrals Provided: PATH	Response options changed
4.17	Residential Move-in Date	Element structural Change
4.21	Connection with SOAR	Collection change – collection now includes PATH
4.24	Last Grade Complete	Response Options added & Collection change – collection now includes SSVF & HUD/VASH
4.26	Employment Status	Collection change – collection now includes HUD/VASH
4.27	General Health Status	Collection change – collection now includes HUD/VASH
4.44	HP Screening Score	Retired (replaced with 4.48)
4.47	T-cell and Viral Load	Response options changed for viral load
4.48	SSVF HP Targeting Criteria	New Element
4.49	Use of Other Crisis Services	New Element
Page 6		Clarified that dependent fields are required in HMIS

Revision History

Date	Version	Revision
08/25/2016	5.1	4.24: added project type 3 PSH to project type applicability 4.21: modify collection points

HMIS DATA DICTIONARY OVERVIEW

Introduction

A Homeless Management Information System (HMIS) is the information system designated by a local Continuum of Care (CoC) to comply with the requirements of CoC Program interim rule 24 CFR 578. It is a locally-administered data system used to record and analyze client, service, and housing data for individuals and families who are homeless or at risk of homelessness. HMIS is a valuable resource because of its capacity to integrate and unduplicate data across projects in a community. Aggregate HMIS data can be used to understand the size, characteristics, and needs of the homeless population at multiple levels: project, system, local, state, and national. The Annual Homeless Assessment Report (AHAR) is HUD's annual report that provides Congress with detailed data on individuals and households experiencing homelessness across the country each year. This report could not be written if communities were not able to provide HUD with reliable, aggregate data on the clients they serve.

In 2010 the U.S. Interagency Council on Homelessness (USICH) affirmed HMIS as the official method of measuring outcomes in its *Opening Doors: Federal Strategic Plan to Prevent and End Homelessness.* Since then many of the federal agencies that provide McKinney-Vento Act and other sources of funding for services to specific homeless populations have joined together and are working with HUD to coordinate the effort.

HMIS is now used by the federal partners and their respective programs in the effort to end homeless-ness, which include:

- U.S. Department of Health and Human Services (HHS)
- U.S. Department of Housing and Urban Development (HUD)
- U.S. Department of Veterans Affairs

The HMIS Data Standards (published in the 2014 HMIS Data Dictionary and HMIS Data Manual) provide communities with baseline data collection requirements developed by each of these federal partners. HUD published the first 2004 HMIS Data and Technical Standards on July 30, 2004 and these served as the foundation for software developers in constructing HMIS applications. In March 2010, HUD updated the Data Standards (March 2010 HMIS Data Standards), primarily to reflect data collection requirements for the Homelessness Prevention and Rapid Rehousing Program (HPRP). HUD, in collaboration with its federal partners, updated the HMIS Data Standards again in 2014 with the release of the 2014 HMIS Data Dictionary and Data Manual. Both documents supersede the previously released HMIS Data Standards. **This release, 2014 HMIS Data Dictionary and Data Manual is Version 5** and is an update of the 2014 Data Standards where HUD and the federal partners updated the standards to reflect critical changes that are needed in 2016. Thus, the standards have only slightly changed and all changes are summarized in the Summary of Changes section above. **All HMIS Data Standard related documents updated and released in the Fall of 2016 are labeled Version 5 – to support version control at all levels of use.**

Dependent Fields: HMIS systems must be able to collect all of the data elements defined in the HMIS Data Dictionary, support system logic identified in this document, and ensure that data collection and the visibility of data elements is appropriate to the project type and federal funding source for any given project.

On or before October 1, 2016 all HMIS software must comply with these data standards established within this Data Dictionary. HUD expects all CoC's to begin using HMIS with the elements contained in these standards on October 1, 2016.

HMIS Related Documents

There are a variety of documents that comprise the suite of HMIS Data Standard resources. **All HMIS Data Standard related documents updated and released in the Fall of 2016 are labeled Version 5 – to support version control at all levels of use.** Each of the documents has a specific purpose and intended audience. The HMIS Lead should be familiar with all of the documents and collectively use them as their HMIS reference materials along with specific materials provided by the software vendor.

HMIS Data Standard Documents

The Data Standard Dictionary and Manual contain the core foundations for the data contained within an HMIS. The Project Descriptor Data Element Manual builds upon information in the Data Dictionary to provide further information for an HMIS Lead's on the elements required by all projects for set up in the HMIS.

Manual Name & Link	Intended Audience	Contents
HMIS Data Standards Dictionary	HMIS Vendors & HMIS Lead Agencies	The manual provides the detailed information required for system programming on all HMIS element and response required to be included in HMIS software. It delineates data collection requirements, system logic, and contains the XML and CSV tables and numbers. The manual also includes critical information about data collection stages, federal partner data collection required elements, and metadata data elements.
HMIS Data Standards Manual	HMIS Lead Agencies & HMIS Users	The manual provides a review of all of the Universal Data Elements and Program Descriptor Data Elements. It contains information on data collection requirements, instructions for data collection, and descriptions that the HMIS User will find as a reference.
HMIS Project Descriptor Data Elements Manual	HMIS Lead Agencies	The Project Descriptor Manual is designed to provide specific information about the Project Descriptors required to be set-up in the HMIS by the HMIS Lead Agency.

HMIS Federal Partner Program Manuals

Each of the Program Manuals were created by HUD along with the department that provides the funding that federal partners use to operate homeless programs. Each federal partner manual has been approved by both HUD and the federal partner, prior to publishing. Each manual contains more specific and detailed information on project typing, the specific data elements are required for each federal partner program/project/component as well as specific data collection information or descriptions that the federal partner has identified as required for their program

Manual Name & Link	Intended Audience	Federal Partner	Contents
CoC Program HMIS Manual	• HMIS Lead Agencies • HMIS Users • Grantees	U.S. Department of Housing and Urban Development – Office of Special Needs Assistance Programs CoC Program information link	The manual assists in project set up of all Continuum of Care (CoC) Program component projects: Transitional Housing, Permanent Supportive Housing, Rapid Re-Housing, and Services Only. Information aligns with the CoC Program Interim Rule.
ESG Program HMIS Manual	• HMIS Lead Agencies • HMIS Users • Recipients • Subrecipients	U.S. Department of Housing and Urban Development – Office of Special Needs Assistance Programs	The manual assists in project set up of all Emergency Solution Grant (ESG) Program component projects: Emergency Shelter (night by night and entry/exit), Street

Manual Name & Link	Intended Audience	Federal Partner	Contents
		ESG Program information link	Outreach, Rapid Re-Housing and Homelessness Prevention. Information aligns with the ESG Program Interim Rule
HOPWA Program HMIS Manual	• HMIS Lead Agencies • HMIS Users • Grantees	U.S. Department of Housing and Urban Development – Office of HIV/AIDS Housing HOPWA Program information link	The manual assists in project set up of all of the Housing Opportunities for Persons with AIDS (HOPWA) program components.
PATH Program HMIS Manual	• HMIS Lead Agencies • HMIS Users • Grantees	U.S. Department of Health and Human Services Substance Abuse and Mental Health Services Administration PATH Program information link	The manual assists in project set up for all Projects for Assistance in Transition from Homelessness (PATH) program component projects: Street Outreach and Services Only.
RHY Program HMIS Manual	• HMIS Lead Agencies • HMIS Users • Grantees	U.S. Department of Health and Human Services Administration for Children and Families Family and Youth Service Bureau RHY Program information link	The manual assists in project set up for all Runaway and Homeless Youth program component projects: Basic Center Program, Street Outreach Program, Transitional Living Program, and Maternity Group Homes.
VA Program HMIS Manual	• HMIS Lead Agencies • HMIS Users • Grantees	Department of Veterans Affairs	This manual assists in projects set up for the Veteran's homeless programs. Programs on HMIS include: SSVF and GPD programs of the VA.

About this Manual

HMIS Concepts and Terms

Continuum of Care (CoC) is used multiple ways:

1. Continuum of Care and Continuum means the group organized to carry out the responsibilities required under the CoC Program Interim Rule (24 CFR Part 578) and is comprised of representatives of organizations, including nonprofit homeless providers, victim service providers, faith-based organizations, governments, businesses, advocates, public housing agencies, school districts, social service providers, mental health agencies, hospitals,

universities, affordable housing developers, and law enforcement, and organizations that serve homeless and formerly homeless persons to the extent that these groups are represented within the geographic area and are available to participate.

2. CoC Program refers to the federal funding source which provides housing and/or service grant dollars.

3. CoC Project refers to a distinct unit of an organization, which may or may not be funded by HUD or the federal partners, that provides services and/or lodging for the homeless and is identified by the Continuum as part of its service system. [Note: a project funded by the CoC may be referred to then as a "CoC program project".]

HMIS User means the individual who uses or enters data in an HMIS or a comparable database approved by the CoC.

HMIS Lead means the entity designated by the Continuum of Care in accordance with the HMIS Proposed Rule[1] (24 CFR Part 580) to operate the Continuum's HMIS on the Continuum's behalf.

HMIS System Administrator means the individual(s) whose job it is to manage the HMIS implementation at the local level: enrolling programs and managing appropriate use, supporting users through connection to, or direct provision of, user training, and overseeing system setup.

Data Element Structure

Every data element required by HUD and the Federal partners to be stored within an HMIS is specified in this document. The following format is used to describe each data element:

Header	Instruction
Element Name	The name of the element.
Field # & Response(s)	The field name and any response options associated with the field. Most elements contain responses of "client doesn't know" and "client refused". Data not collected continues to be identified as a response option in this HMIS Data Dictionary. It is not a response option necessary in every system or in every element. The element is required for use by any HMIS system which requires a response to an element before allowing the user to move forward in the system. Adding the response option of "data not collected" enables a user who did not collect or simply does not have the information to enter a response that does not present a false answer. HMIS systems which require entry of any element for the system to progress must implement the "data not collected" response for all elements that require a response. [System Note: data not collected will equate to missing data or null values as appropriate for transfer and reporting purposes.]
Dependent to Field # & Response #	Dependent fields and dependent response options identify the Field and Response option to which they are dependent.

---

[1] As of June, 2016 the HMIS Rule is not in effect. When HUD publishing the final HMIS Rule communities will be given time to come into compliance with the rule.

Header	Instruction
	The dependencies outlined in the Data Dictionary are expected to be visible to users on-screen. The methods vendors may elect to make dependencies visible/invisible; colored for completion/shaded out; etc. are up to each software developer.
Element Type	The type of data element (project descriptor, universal, program-specific or metadata) which indicates the level at which data are collected, whether they apply to all funding sources, and their relationship to other data. 1. Project Descriptor Data Elements are the required project level elements initially entered at the setup stage of the project within an HMIS that specifically identify the organization, project name, continuum(s) in which the project operates type of project, bed and unit inventory for residential projects, and funding sources. In systems that are able to generate Housing Inventory Count (HIC) data, there are additional data elements relevant to that purpose. 2. Universal Data Elements are client level data elements required for collection by all projects participating in HMIS, regardless of project type or funding source. 3. Program-Specific Data Elements are client level elements required by a specific federal program or program component. 4. Metadata Elements are data about data elements documenting required metadata collection.
Funder: Program-Component	Identifies the federal department, the program, and the program component which requires the collection of the element. In this version of the Data Dictionary the Funder: Program Component section under the Program Specific Data Elements has been changed from a table to text and VA: HCHV and VA GPD have been removed from the selection as they only collect Universal Data Elements. This change was made to facilitate understanding. No changes have been made to the funder or component requiring collection for any element.
Project Type Applicability	Project type(s) refers to element 2.4 *Project Type* and identifies the HMIS project type required to collect the data element.
Data Collected About	Identifies the universe of client(s) for whom an element response is required (e.g. Head of Household, Adults, Children, etc.). Data may be collected about a wide group (e.g. all household members) but data reporting will be specified on the persons required to have the data collected about.
Collection Point	The point(s) at which the data must be able to be collected in an HMIS. In addition to specifying the stage of data collection, the collection point is also recorded via metadata (element 5.3). Record creation – Indicates the element is required to be collected when the client record is created. Elements collected at record creation should have one and only one value for each client in an HMIS. Data are collected and entered into the HMIS, responses must be reviewed for accuracy at each project entry and edited as necessary to make corrections or to improve data quality. Project entry – Indicates the element is required to be collected at every project entry. Elements collected at project entry must have an *Information Date* that matches the client's *Project Entry Date* and be recorded via 5.3 *Data Collection Stage* of 'project

Header	Instruction
	entry.' Information must be accurate as of the *Project Entry Date*. There should be one and only one record with a Data Collection Stage of 'project entry' for each relevant data element for any given project entry.

Data may be edited by users associated with the project to correct errors or omissions; such edits will not change the data collection stage associated with the record.

Update – Indicates the element may be collected and entered into HMIS at multiple points during a project enrollment in order to track changes over time. The system must be able to support a theoretically unlimited number of update records per enrollment. Each 'update' requires the creation of a new record with a distinct *Information Date*. The *Information Date* should reflect the date on which the information is collected and/or the date for which the information is relevant for reporting purposes. Information must be accurate as of the *Information Date*, regardless of when it is actually collected or entered into HMIS. Data may be edited by users associated with the project to correct errors or omissions; such edits will change neither the data collection stage nor the information date unless it is explicitly change by the user.

Annual assessment – Is a specialized subset of the 'update' collection point. The annual assessment is to be recorded no more than 30 days before or after the anniversary of the client's *Project Entry Date,* regardless of the date of the most recent 'update' or 'annual assessment', if any [annually]. Information must be accurate as of the *Information Date.*

For HUD-funded programs and HUD reporting purposes, the implementation of 'annual assessment' as a data collection stage by vendors became mandatory in 2014; the data collection stage may not be inferred from the Information Date, although the field must have an *Information Date* recorded with it. In order to be considered reportable to HUD as an annual assessment, data must be stored with a *Data Collection Stage* of 'annual assessment'.

There should be one and only one record for each data element annually with a *Data Collection Stage* recorded as 'annual assessment' associated with any given client and project entry ID within the 60-day period surrounding the anniversary of the client's *Project Entry Date*. Regardless of whether or not the responses have changed since project entry or the previous annual assessment, a new record must be created for each subsequent annual assessment such that it is possible to view a history, by date, of the values for each data element.

Data may be edited by users associated with the project to correct errors or omissions; such edits will change neither the data collection stage nor the information date unless they are explicitly altered by the user.

Project exit – Indicates the element is required to be collected at every project exit. Elements collected at project exit must have an *Information Date* that matches the client's *Project Exit Date* and a *Data Collection Stage* of 'project exit.' Information must be accurate as of the *Project Exit Date*. There should be one and only one record with a *Data Collection Stage* of 'project exit' for each relevant data element for any given project exit.

Header	Instruction
	Data may be edited by users associated with the project to correct errors or omissions; such edits will not change the data collection stage or the information.
System Logic	Logically required data collection or system structure information for HMIS software development purposes.
Other System Issues	Information on rationale, conditions, constraints, etc. that may be applicable to a specific element and are important for HMIS software development purposes.
XML	XML element in XML Specifications where the data standard element is located.
CSV	Primary file in CSV Specifications where the data standard element is located.
Critical Updates to 2014 Standards	Documentation of changes to the element from the 2014 HMIS Data Standards: Data Dictionary V 3 to the 2014 Data Dictionary Version 5.

Exhibit 1 – Federal Funding Sources Relation to HMIS Project Types

This exhibit illustrates the project types (element 2.4) that may be associated with each HMIS Federal Partner Program depending on the component/activity funded.

Federal Program	HMIS Project Type												
	1	2	3	4	6	7	8	9	10	11	12	13	14
HUD: Continuum of Care Program (CoC)		X	X	X	X		X	X			X	X	X
HUD: Emergency Solutions Grant program (ESG)	X			X						X	X	X	X
HUD: Rural Housing Stability Assistance Program (RHSAP)													
HUD: Housing Opportunities for Persons with AIDS (HOPWA)	X	X	X		X						X		
HUD: Veterans Affairs Supportive Housing (HUD-VASH)			X										
HHS: Runaway and Homeless Youth Programs (RHY)	X	X		X	X						X		
HHS: Projects for Assistance in Transition from Homelessness (PATH)				X	X								
VA: Grant and Per Diem Program (GPD)		X											
VA: Supportive Services for Veteran Families (SSVF)											X	X	
VA: Community Contract Emergency Housing (HCHV/EH)	X												

#	HMIS Project Types – Referenced Above by Number	#	HMIS Project Types – Referenced Above by Number
1	Emergency Shelter	8	Safe Haven
2	Transitional Housing	9	PH – Housing Only
3	PH - Permanent Supportive Housing (disability required for entry)	10	PH – Housing with Services (no disability required for entry)
4	Street Outreach	11	Day Shelter
5	RETIRED	12	Homelessness Prevention
6	Services Only	13	PH - Rapid Re-Housing
7	Other	14	Coordinated Assessment

PROJECT DESCRIPTOR DATA ELEMENTS

Project descriptor data elements are intended to identify the organization, specific project, and project details to which an individual client record in an HMIS is associated. The project descriptors are generally managed in an HMIS by a system administrator, not a user. They are created at initial new project setup within the HMIS and are intended to be updated, as needed, on a regular basis by the system administrator, no less than once annually. If data within project descriptor data elements are able to be entered or updated by a user, then the HMIS system administrator must have oversight and review ability.

This section describes the data to be recorded in HMIS for each project descriptor data element and its relation to each project entering data. The project descriptor data elements create a basis for identifying the organization, project, project type, and federal partner funder(s). Correct use of the 2.4 Project Type and 2.6 Funding Sources data elements will help assure that projects are identified for correct visibility and are able to generate reports required for each of the federal partners as reporting parameters will be based off of one or both of these elements.

The following Project Descriptor Data Elements are not optional:

HUD has removed the requirement for the annual HUD Housing Inventory Count (HIC) to be completed utilizing exported data from the HMIS. Therefore, the elements necessary for the completion of the HIC (2.8 and 2.9) are shown here as optional elements. An HMIS may continue to provide the capacity to generate the HIC from an HMIS and CoCs may continue to utilize that capacity should they elect. The optional project descriptor data elements are designed to capture information on residential continuum projects which include: emergency shelters, transitional housing, safe havens, and all forms of permanent housing.

The following Project Descriptor Data Elements are optional:

2.1 Organization Identifiers

Header	Instruction
Element Name	Organization Identifiers
Field 1 & Response	Organization ID – auto generate
Field 2 & Response	Organization Name
Element Type	Project Descriptor
Funder: Program- Component	All Programs – All Components
Project Type Applicability	All HMIS Project Types
Data Collected About	All organizations

Header	Instruction
Collection Point	Initial HMIS project setup, reviewed/updated no less than annually
System Logic	An Organization ID must be assigned to each project via a system generated number or code. Each organization must receive a distinct identifier that is consistently associated with that organization. Each organization must also be able to be associated with one or more projects. The name of the organization must be captured in text within the HMIS.
Other System Issues	An HMIS must allow the HMIS Lead to activate and deactivate an organization. An HMIS application may permit the creation of a common name field more familiar to users for use within the application while retaining the legal name for use in reporting.
XML	<Organization>
CSV	Organization
2014 Version 5 Updates	None

2.2 Project Identifiers

Header	Instruction
Element Name	Project Identifiers
Project Type Applicability	All HMIS Project Types
Field 1 & Response	Project ID – auto generate
Field 2 & Response	Project Name
Element Type	Project Descriptor
Funder: Program- Component	All Programs – All Components
Project Type Applicability	All HMIS Project Types
Data Collected About	All Projects
Collection Point	Initial HMIS project setup, reviewed/updated no less than annually
System Logic	A Project ID must be assign to each project via a system generated number or code. Each project must receive a distinct identifier that is consistently associated with that project. Each project must also be able to be associated with an organization. The name of the project must be captured in text within the HMIS.
Other System Issues	An HMIS must allow the HMIS Lead to activate and deactivate a project. An HMIS application may permit the creation of a common name element more familiar to users for use within the application while retaining the legal name for use in reporting.
XML	<Project>
CSV	Project
2014 Version 5 Updates	None

2.3 Continuum of Care Code

Header	Instruction
Element Name	Continuum of Care Code
Field 1 & Response	Continuum Code - HUD-assigned CoC codes for the project location
Element Type	Project Descriptor
Funder: Program- Component	All Programs – All Components
Project Type Applicability	All HMIS Project Types
Data Collected About	All projects that serve clients
Collection Point	Initial HMIS project setup, reviewed/updated no less than annually
System Logic	Collect once at initial setup. System stores collected CoC codes and retains for historical purposes. Allow edits if changes are made to the CoC or corrections for data entry error; retain the original affiliation only as necessary for reporting.
Other System Issues	Projects may be funded to provide for housing and/or services to clients residing in only one CoC (e.g. CoC: Transitional Housing), or they may be funded for housing and/or services across multiple CoCs (e.g. VA: SSVF). The system must allow for multiple codes selected per project.

It must be possible to associate a project with the CoC code for every geographic area in which the project operates and for which it will be entering data into the HMIS.

If the HMIS produces CoC-level reporting on 2.7 Bed and Unit Inventory (AHAR and/or HIC) for more than one continuum, records of inventory must be separate and associated with the CoC where the inventory is located.

If the system sets a default value for the CoC Code, it should be the CoC code for the continuum operating the HMIS.

For data quality purposes, HUD strongly encourages that CoC Codes in this data element be used to populate an option list of CoC Codes for data element 3.16 Client Location. |
XML	<ProjectCoC>
CSV	ProjectCoC
2014 Version 5 Updates	Updated guidance instructing systems to allow for multiple CoC codes to be selected per project

2.4 Project Type

Header	Instruction
Element Name	Project Type
Field 1 & Responses	Continuum Project
0	No

Header	Instruction
1	Yes
Field 2 & Responses	Project Type
1	Emergency Shelter
2	Transitional Housing
3	PH - Permanent Supportive Housing (disability required for entry)
4	Street Outreach
5	RETIRED
6	Services Only
7	Other
8	Safe Haven
9	PH – Housing Only
10	PH – Housing with Services (no disability required for entry)
11	Day Shelter
12	Homelessness Prevention
13	PH - Rapid Re-Housing
14	Coordinated Assessment
Dependent A – Dependent to Field 2 & Response 6	*If Services Only for "Project Type"* Affiliated with a residential project
0	No
1	Yes
Dependent B – Dependent to Dependent A & Response 1	*If Yes for "Affiliated with a residential project"* Project ID(s) of residential project(s) affiliated with SSO
Element Type	Project Descriptor
Funder: Program- Component	All Programs – All Components
Project Type Applicability	All HMIS Project Types
Data Collected About	All projects
Collection Point	Initial HMIS project setup, reviewed/updated no less than annually
System Logic	Collect once at initial setup. System stores collected project type and retains for historical purposes. Allow updates if changes or corrections for data entry error. A project can only have one project type assigned. A project must be able to identify multiple affiliated residential projects if "yes" to Dependent A.
Other System Issues	A continuum project refers to all projects within the Continuum of Care that provide housing and/or services for homeless persons. A Continuum project is not limited to those projects funded by HUD and should include all of the federal partner projects and all other federally or non-federally funded projects functioning within the Continuum. General rules of project typing: 1. A project is to be assigned a type based on the lodging or service it is providing.

Header	Instruction
	2. If a project has more than one residential project type, each type must be set up in HMIS as a separate project. (For example, an emergency shelter and a transitional housing project must be set up as two separate projects in HMIS, even if there is a single funding source for both). 3. A residential project that is funded under one or more separate grants to provide supportive services to 100% of clients of the residential project, may be set up as a single project with the appropriate residential project type. All federal funding sources must be identified in *2.6 Federal Partner Funding Sources*. 4. A project that provides street outreach must be typed "4 – Street Outreach". (Note: a street outreach project that also has a direct service component serving persons other than "street homeless" will require two separate projects to be set up in an HMIS – a "4- Street Outreach" and a "6- Services Only"). 5. A project that provides only services (other than outreach), has associated housing outcomes, and is not limited to serving clients of one or more specific residential project should be typed as "6 – Services Only" and *Affiliated with a Residential Project* will be "No." 6. A project that provides only services (other than outreach), has associated housing outcomes, and is restricted by its grant agreement to serve only clients of one or more specific residential projects should be typed as "6 – Services Only" and *Affiliated with a Residential Project* will be "Yes." Each of the residential projects with which the services only project is associated must be identified. 7. A project that provides only services (other than outreach) that are "stand alone supportive services" and have no associated housing outcomes should be typed as "7 – Other." (For example, a project funded to provide child care for persons in permanent housing or a dental care project funded to serve homeless clients should be typed "7 – Other." A project funded to provide ongoing case management should be typed "6 – Services Only.") For guidance see Exhibit 1: Federal Funding Sources Relation to HMIS Project Types within this document. Project Type guidance is also available in the individual HMIS Program Handbooks (ESG, CoC, HOPWA, RHY, PATH, VA). Note: Projects which only provide services and are funded under the HUD CoC Program after FY 2014 which provide services exclusively to clients of a single residential project type (other than emergency shelter) will be identified in *2.6 Federal Partner Funding Sources* with the component type of the residential project(s) and not "Services Only". These projects must still be classified with a Project Type of "Services Only." For the sake of consistency, it is recommended that Dependent B is selected from a drop down list created from element 2.2 Project Identifiers that includes the Project Names and IDs for all non-emergency shelter projects.

2.5 Method for Tracking Emergency Shelter Utilization

Header	Instruction
Element Name	Method for Tracking Emergency Shelter Utilization
Field 1 & Responses	Emergency Shelter Tracking Method
0	Entry/Exit Date (e/e)
3	Night-by-Night (nbn)
Element Type	Project Descriptor
Funder: Program- Component	HUD:CoC – No component requires data collection HUD:ESG – Collection required for all ES components HUD:HOPWA – Collection required for Hotel/Motel ES e/e components HUD:HUD-VASH - No component requires data collection HUD:RHSAP - No component requires data collection HHS:PATH – Collection required for all components HHS: RHY - Collection required for BCP – ES e/e components VA:SSVF – No component requires data collection
Project Type Applicability	1: Emergency Shelter
Data Collected About	All emergency shelters
Collection Point	Initial HMIS project setup, reviewed/updated no less than annually
System Logic	Collect at initial setup. System stores collected method and retains for historical purposes. Allow updates to be made if the project changes models and corrections for data entry error.
Other System Issues	One method must be identified in an HMIS for each emergency shelter project. Reporting and outcomes will differ depending on the method utilized by the shelter. The entry/exit method should be used for all shelters which require an entry, a continuous stay, and an exit. The length of stay will be calculated based on the number of nights between project entry and project exit and performance measurement will include changes from project entry and project exit data collection stages. Funder preference for emergency shelter projects is the use of the project entry/exit date method except for projects where clients are permitted to enter and exit on an irregular basis (e.g. mass shelter). The night-by-night method should be used for shelters which allow clients to enter and exit on an irregular basis and do not require a continuous stay and must instead rely on a method of tracking "bed nights". In this method (1) all data required to be collected at project entry is collected; (2) the project records every discrete date (or series of dates) that the client utilizes a bed; (3) the system maintains historical data on the nights sheltered; (4) the duration of each stay can be accurately determined and aggregated to calculate each client's total length of stay in the project; and (5) the client may be exited or the system may be designed to automatically generate an exit after an extended absence. Length of stay is calculated on bed nights utilized in this method.

Header	Instruction
	The method used is important for the indication of length of stay in projects. Only projects utilizing a project entry/exit date comparison will be able to report on a continuous length of stay.
	Utilization of the night-by-night method does not mean that an HMIS must identify a client in a specific bed. If the HMIS supports a custom module that identifies clients in a bed that module may continue to be used. However, use of that module does not necessarily equate with the new night-by-night model.

2.6 Federal Partner Funding Sources

Header	Instruction
Element Name	Funding Sources
Field 1 & Responses	Federal Partner Program and Components
1	HUD:CoC – Homelessness Prevention (High Performing Comm. Only)
2	HUD:CoC – Permanent Supportive Housing
3	HUD:CoC – Rapid Re-Housing
4	HUD:CoC – Supportive Services Only
5	HUD:CoC – Transitional Housing
6	HUD:CoC – Safe Haven
7	HUD:CoC – Single Room Occupancy (SRO)
8	HUD:ESG – Emergency Shelter (operating and/or essential services)
9	HUD:ESG – Homelessness Prevention
10	HUD:ESG – Rapid Rehousing
11	HUD:ESG – Street Outreach
12	HUD:Rural Housing Stability Assistance Program
13	HUD:HOPWA – Hotel/Motel Vouchers
14	HUD:HOPWA – Housing Information
15	HUD:HOPWA – Permanent Housing (facility based or TBRA)
16	HUD:HOPWA – Permanent Housing Placement
17	HUD:HOPWA – Short-Term Rent, Mortgage, Utility assistance
18	HUD:HOPWA – Short-Term Supportive Facility
19	HUD:HOPWA – Transitional Housing (facility based or TBRA)
20	HUD:HUD/VASH
21	HHS:PATH – Street Outreach & Supportive Services Only
22	HHS:RHY – Basic Center Program (prevention and shelter)
23	HHS:RHY – Maternity Group Home for Pregnant and Parenting Youth
24	HHS:RHY – Transitional Living Program
25	HHS:RHY – Street Outreach Project
26	HHS:RHY – Demonstration Project**
27	VA: Community Contract Emergency Housing
28	VA: Community Contract Residential Treatment Program***

Header	Instruction
29	VA:Domiciliary Care***
30	VA:Community Contract Safe Haven Program***
31	VA:Grant and Per Diem Program
32	VA:Compensated Work Therapy Transitional Residence***
33	VA:Supportive Services for Veteran Families
34	N/A
Field 2 & Response	Grant Identifier
Field 3 & Response	Grant Start Date ([date field])
Field 4 & Response	Grant End Date ([date field])
Element Type	Project Descriptor
Funder: Program- Component	All Programs – All Components
Project Type Applicability	All HMIS Project Types
Data Collected About	All projects
Collection Point	Initial HMIS project setup, reviewed/updated no less than annually
System Logic	Collect at initial setup. System stores collected federal program/grant identifier and retains for historical purposes. Allow corrections for data entry error. An HMIS must allow projects with multiple funder sources and multiple grants (with potentially different grant terms) from the same funding source to record and store all funding sources for the project.
Other System Issues	The federal funding sources listed in Field 1 & Response are the federal partner programs and their project components who have agreed as of January, 2014 to participate in HMIS. An HMIS may elect to identify other funding sources as may be appropriate to the CoC, but must have available the identification of all of the sources identified in Field 1 & Response. A grant identifier is to be assigned to each federal program being used for funding for the project. The grant identifier may be the grant number or any other identification system utilized by the CoC. All sub-grantees of a principal grant should use the same grant identifier as the principal grantee as a method of allowing for aggregated reporting by the principal grantee.
XML	<Funder>
CSV	Funder
2014 Version 5 Updates	None
Element Footnotes	**HHS:RHY –Demonstration Project–It is the present intention of FYSB that any demonstration projects under RHY will be required to utilize HMIS in data collection. The demonstration project has therefore been included as a placeholder. ***VA programs not required to enter data into an HMIS except for Project Descriptor Data Elements in CoC's where HMIS is generating the HIC.

2.7 Bed and Unit Inventory Information

Header	Instruction
Element Name	Bed and Unit Inventory Information
Field 1 & Response	Information Date

Header	Instruction
Field 2 & Responses	Household Type
1	Households without children
3	Households with at least one adult and one child
4	Households with only children
Field 3 & Responses	Bed Type (ES Only)
1	Facility-based
2	Voucher
3	Other
Field 4 & Responses	Availability (ES Only)
1	Year-round
2	Seasonal
3	Overflow
Field 5 & Response	Bed Inventory
Dependent A – Dependent to Field 5 Response	*If Bed Inventory is not blank*-Of the total inventory what number of beds are dedicated to: (Allow separate integer response for each option)
1	Chronic Homeless Bed Inventory (PSH Only)
2	Veteran Bed Inventory
3	Youth Beds Inventory
Dependent B – Dependent to Dependent A & Response 3	If Youth Beds Inventory is not blank Of the youth beds what number are restricted to: (Allow separate integer response for each option)
1	Only under age 18
2	Only ages 18 to 24
3	Only youth under age 24 (both of the above)
Field 6 & Response	Unit Inventory
Field 7 & Response	Inventory Start Date (optional field)
Field 8 & Response	Inventory End Date (optional field)
Field 9 & Response	HMIS Participating Beds
Element Type	Project Descriptor
Funder: Program- Component	All Programs – All Components
Project Type Applicability	1: Emergency Shelter 2: Transitional Housing 3: PH- Permanent Supportive Housing 8: Safe Haven 9: PH- Housing Only 10: PH- Housing with Services 13: PH- Rapid Re-Housing
Data Collected About	Projects intended to be included in the HUD Housing Inventory Count of the CoC
Collection Point	Initial HMIS project setup, reviewed no less than annually and updated when inventory changes or at least annually.

Header	Instruction
System Logic	Collect at initial setup. System stores collected bed and unit inventory information and retains for historical purposes. Allow corrections for data entry error.
	An HMIS may track the data in a variety of ways as long as historical data are maintained, the HIC can be produced if required by the CoC, and inventory data can be mapped to the linked inventory data elements described in this section. A record(s) must be established for each project. The system must be able to identify *Household Types* served, *Bed Types*, and *Availability*. A project that serves both households without children and households with at least one adult and one child will have at least two Bed and Unit Inventory information records if the element is structured as shown in order to track inventory information by household type. If a project operates different types of beds (e.g., year-round and seasonal) then a separate record is established for each bed type. For example, a project that serves single adults and has 100 beds, of which 20 are seasonal, would have two bed and unit inventory records. One record is for the 80 facility-based year-round beds for households without children and a second record is for the 20 facility-based seasonal beds for households without children. However, the data may also be structured as dependent fields which could allow a single record creation for each project and enable the variety of configurations possible. Either option is acceptable.
Other System Issues	These fields must be transactional, meaning they must be able to record multiple values over time along with the date that the information changed. The inventory updates should reflect changes in standard project operations, but need not reflect day-to-day fluctuations. Examples of housing inventory changes that should be tracked historically include: the addition or removal of a group of new beds or units; the addition or removal of seasonal beds that are available for any period in the year; a project decision to dedicate beds to a different household type; or changes in HMIS bed participation. The inventory history should reflect changes in standard project operations, but need not reflect day-to-day fluctuations.
	These data may also be collected separately for distinct sites within a project as long as they can be aggregated to the project level.
XML	<Inventory>
CSV	Inventory
2014 Version 5 Updates	None

2.8 Site Information – OPTIONAL   PENDING CHANGE COMING FOR THE AHAR REDESIGN

Header	Instruction
Element Name	Site Information
Field 1 & Responses	Principal Site
0	No
1	Yes
Dependent A – Dependent to Field 1 & Response	If Yes to "Principal Site" – HUD Geocode
Field 2 & Response	Street Address
Field 3 & Response	City

Header	Instruction
Field 4 & Response	State
Field 5 & Response	Zip Code
Element Type	Project Descriptor OPTIONAL element for systems that generate a Housing Inventory Count
Funder: Program- Component	All Programs – All Components
Project Type Applicability	1: Emergency Shelter 2: Transitional Housing 3: PH- Permanent Supportive Housing 8: Safe Haven 9: PH- Housing Only 10: PH- Housing with Services 13: PH- Rapid Re-Housing
Data Collected About	Projects intended to be included in the HUD Housing Inventory Count of the CoC
Collection Point	Initial HMIS project setup, reviewed/updated no less than annually
System Logic	Collect once at initial setup. System stores collected site information and retains for historical purposes. Allow updates if changes or corrections for data entry error.
Other System Issues	This element is optional. If the CoC does not elect to utilize the HMIS to generate the HUD Housing Inventory Count, then this field is not required. An HMIS must have the capability of allowing projects to enter site information for multiple sites for a single project. Projects that are physically located in multiple CoCs that cross HMIS systems must be recorded as distinct projects within each CoC's HMIS.

2014 Version 5 Updates	New Data Element

UNIVERSAL DATA ELEMENTS

Universal data elements are those which all HMIS participating continuum projects are required to complete. It is important to note that federal funding sources (programs) often require the projects they fund to maintain and report on additional data elements – identified as Program Specific elements. **HMIS Universal Data Elements are elements required to be collected by all projects using the software as an HMIS.** Projects funded by any one or more of the federal partners must collect the Universal Data Elements, as do projects that are not funded by any federal partner (e.g. missions) but are entering data as part of the Continuum of Care's HMIS implementation.

Universal data elements enable the HMIS the ability to record unique, unduplicated client records, establish participation in a project within a date range, and identify clients who meet time criteria for chronic homelessness.

3.1	Name	3.917	Living Situation
3.2	Social Security Number	3.10	Project Entry Date
3.3	Date of Birth	3.11	Project Exit Date
3.4	Race	3.12	Destination
3.5	Ethnicity	3.13	Personal ID
3.6	Gender	3.14	Household ID
3.7	Veteran Status	3.15	Relationship to Head of Household
3.8	Disabling condition	3.16	Client Location

3.1 Name

Header	Instruction
Element Name	Name
Field 1 & Response	First (text)
Field 2 & Response	Middle (text)
Field 3 & Response	Last (text)
Field 4 & Response	Suffix (text)
Field 5 & Responses	Name Data Quality
1	Full name reported
2	Partial, street name, or code name reported
8	Client doesn't know
9	Client refused

Header	Instruction
99	Data not collected
Element Type	Universal
Funder: Program- Component	All Programs – All Components
Project Type Applicability	All HMIS Project Types
Data Collected About	All Clients
Collection Point	Record Creation
System Logic	Collect once and only once. System stores collected information. Updates not required, allow corrections for data entry errors.
Other System Issues	Systems may elect to utilize an extra field(s) for alias or for notes on name changes.
XML	<Client><…>
CSV	Client
2014 Version 5 Updates	None

3.2 Social Security Number

Header	Instruction
Element Name	Social Security Number
Field 1 & Responses	SSN Data Quality
1	Full SSN reported
2	Approximate or partial SSN reported
8	Client doesn't know
9	Client refused
99	Data not collected
Element Type	Universal
Funder: Program- Component	All Programs – All Components
Project Type Applicability	All HMIS Project Types
Data Collected About	All Clients
Collection Point	Record Creation
System Logic	Collect once and only once. System stores collected nine-digit SSN in one field and the appropriate SSN data quality in another. Updates not required, allow corrections for data entry errors.
Other System Issues	The HMIS may include hyphens or other punctuation within the SSN to improve readability, but the SSN must be exportable as a single alphanumeric field containing a maximum of nine characters and no punctuation.

HMIS solutions and HMIS administrators (if the system permits) may designate special *non-numeric* characters (e.g., the letter x) to indicate missing digits and otherwise devise methodologies to allow entry and effective matching of partial SSNs. Because missing digits may appear in any one of the nine placeholders, it is critical for the system to have a mechanism to indicate which digits were missing when entering partial SSNs; an alphabetic character must be interpreted as a placeholder. |

Header	Instruction
	The HMIS may elect to add an additional field, in a manner defined by the system, for clients who do not have a SSN to facilitate merging duplicated records.
XML	<Client><...>
CSV	Client
2014 Version 5 Updates	None

3.3 Date of Birth

Header	Instruction
Element Name	Date of Birth
Field 1 & Responses	DOB Data Quality
1	Full DOB reported
2	Approximate or partial DOB reported
8	Client doesn't know
9	Client refused
99	Data not collected
Element Type	Universal
Funder: Program- Component	All Programs – All Components
Project Type Applicability	All HMIS Project Types
Data Collected About	All Clients
Collection Point	Record Creation
System Logic	Collect once and only once. System stores collected DOB in one field and the appropriate DOB data quality type in another. Updates not required, allow corrections for data entry errors.
Other System Issues	One date-format field for birth dates should be created in the HMIS database. Date of birth must be exportable in the [date field] format.
XML	<Client><...>
CSV	Client
2014 Version 5 Updates	None

3.4 Race

Header	Instruction
Element Name	Race
Field 1 & Responses	Race (as many as are applicable)
1	American Indian or Alaska Native
2	Asian
3	Black or African American
4	Native Hawaiian or Other Pacific Islander
5	White
8	Client doesn't know
9	Client refused
99	Data not collected
Element Type	Universal

Header	Instruction
Funder: Program- Component	All Programs – All Components
Project Type Applicability	All HMIS Project Types
Data Collected About	All Clients
Collection Point	Record Creation
System Logic	Collect once and only once. System stores collected information. Updates not required, allow corrections for data entry errors. The HMIS must accommodate the recording of up to five race response categories per client.
Other System Issues	'Client doesn't know,' 'Client refused,' and 'Data not collected' are not races; they are explanations for missing race data. None of these three responses are valid in conjunction with any other response.
XML	<Client><Race>
CSV	Client
2014 Version 5 Updates	None

3.5 Ethnicity

Header	Instruction
Element Name	Ethnicity
Field 1 & Responses	Ethnicity
0	Non-Hispanic/Non-Latino
1	Hispanic/Latino
8	Client doesn't know
9	Client refused
99	Data not collected
Element Type	Universal
Funder: Program- Component	All Programs – All Components
Project Type Applicability	All HMIS Project Types
Data Collected About	All Clients
Collection Point	Record Creation
System Logic	Collect once and only once. System stores collected information. Updates not required, allow corrections for data entry errors.
Other System Issues	None
XML	<Client><Ethnicity>
CSV	Client
2014 Version 5 Updates	None

3.6 Gender

Header	Instruction
Element Name	Gender
Field 1 & Responses	Gender
0	Female
1	Male
2	Transgender male to female

Header	Instruction
3	Transgender female to male
4	Doesn't identify as male, female, or transgender
8	Client doesn't know
9	Client refused
99	Data not collected
Element Type	Universal
Funder: Program- Component	All Programs – All Components
Project Type Applicability	All HMIS Project Types
Data Collected About	All Clients
Collection Point	Record Creation
System Logic	Collect once and only once. System stores collected information. Updates not required, allow corrections for data entry errors.
Other System Issues	All prior response option 4 "other" may change to the new response 4 "Doesn't identify as male, female, or transgendered". The same field number may be used in the system and wording may simply be updated to "doesn't identify as male, female, or transgender" in order to protect the unduplication and reporting capacities of the system already constructed.
XML	<Client><…>
CSV	Client
2014 Version 5 Updates	Replaced "other" response with "Doesn't identify as male, female, or transgender and removed Dependent A to describe "other".

3.7 Veteran Status

Header	Instruction
Element Name	Veteran Status
Field 1 & Responses	Veteran Status
0	No
1	Yes
8	Client doesn't know
9	Client refused
99	Data not collected
Element Type	Universal
Funder: Program- Component	All Programs – All Components
Project Type Applicability	All HMIS Project Types
Data Collected About	All Adults
Collection Point	Record Creation
System Logic	Collect once at FIRST project entry as an adult. System stores collected information and retains for historical purpose. A user must have the ability to enter data for a client who turns 18 after project entry.
Other System Issues	Veteran status should carry forward from project entry to project entry (e.g. DOB carry forward) within the HMIS. User changes should be allowed for three cases: (1) when a client ages into adulthood (if the system does not program

Header	Instruction
	for that), (2) when a client who has historically has been served as a non-vet enrolls in the service and returns later as a veteran, or (3) when a data entry error has occurred. Updates are required for persons aging into adulthood. Systems may be programmed to automatically create a response for clients who turn 18 while enrolled; the auto-generated response should be 'No.
XML	<Client><VeteranStatus>
CSV	Client
2014 Version 5 Updates	None

3.8 Disabling Condition

Header	Instruction
Element Name	Disabling Condition
Field 1 & Responses	Disabling Condition
0	No
1	Yes
8	Client doesn't know
9	Client refused
99	Data not collected
Element Type	Universal
Funder: Program- Component	All Programs – All Components
Project Type Applicability	All HMIS Project Types
Data Collected About	All clients
Collection Point	Project Entry
System Logic	Collect once at project entry. System stores collected information and retains for historical purpose.
Other System Issues	Disabling Condition directly relates to the Program-Specific Elements capturing more detailed information on Special Needs: Physical Disability, Developmental Disability, Chronic Health Condition, HIV/AIDS, Mental Health Problem, and/or Substance Abuse. If all of the Special Needs elements are present for completion in the HMIS application for a particular project, then disabling condition may be inferred to be "yes" from an answer of "yes" to the dependent field in those elements "expected to be of long–continued and indefinite duration and substantially impairs ability to live independently". Disabling condition may either be entered by the user independently of any other special need field, or data in this field may be inferred by the responses to "ability to live independently". If any one of these is "yes" then disabling condition should also be "yes".
XML	<Enrollment><DisablingCondition>
CSV	Enrollment
2014 Version 5 Updates	Update universe of data collected from "Adults" to "All clients"

3.917   Living Situation

The universal data elements 3.9 *Residence Prior to Project Entry* and 3.17 *Length of Time on the Streets, in an Emergency Shelter or in a Safe Haven* have been combined into one element 3.917 Living Situation. To facilitate data entry and in response to multiple user questions, the element has been split into two sub-elements which use only the fields and responses necessary for the population being asked the question. **3.917A** is to be used for all persons in a Street Outreach, Emergency Shelter or Safe Haven project and **3.917B** is to be used for persons in all other HMIS project types. The internal HMIS field numbers for the fields and dependents of the sub-elements MUST be the same for like responses.   With this separation and clarification, the definition of chronic homelessness as identified in the final rule in the [Federal Register] published December 5, 2015 is able to be fully reported through an HMIS.

3. 917A Living Situation
For persons entering HMIS Project Type: Street Outreach, Emergency Shelter, & Safe Haven

Header	Instruction
Field 1 & Responses	Type of Residence
Header: *HOMELESS SITUATION*	
16	Place not meant for habitation
1	Emergency shelter, including hotel or motel paid for with emergency shelter voucher
18	Safe Haven
27	Interim Housing
Header: *INSTITUTIONAL SITUATION*	
15	Foster care home or foster care group home
6	Hospital or other residential non-psychiatric medical facility
7	Jail, prison or juvenile detention facility
24	Long-term care facility or nursing home
4	Psychiatric hospital or other psychiatric facility
5	Substance abuse treatment facility or detox center
Header: *TRANSITIONAL AND PERMANENT HOUSING SITUATION*	
14	Hotel or motel paid for without emergency shelter voucher
23	Owned by client, no ongoing housing subsidy
21	Owned by client, with ongoing housing subsidy
3	Permanent housing for formerly homeless persons (such as: a CoC project;
22	Rental by client, no ongoing housing subsidy
19	Rental by client, with VASH subsidy
25	Rental by client, with GPD TIP subsidy
20	Rental by client, with other ongoing housing subsidy
26	Residential project or halfway house with no homeless criteria
12	Staying or living in a family member's room, apartment or house
13	Staying or living in a friend's room, apartment or house
2	Transitional housing for homeless persons (including homeless youth)
8	Client doesn't know
9	Client refused

Header	Instruction
99	Data not collected
Field 2 & Responses	**Length of stay in prior living situation**
10	One night or less
11	Two to six nights
2	One week or more, but less than one month
3	One month or more, but less than 90 days
4	90 days or more, but less than one year
5	One year or longer
8	Client doesn't know
9	Client refused
99	Data not collected
Field 3 & Responses	Approximate date homelessness started: (date) [date field]
Field 4 & Responses	(Regardless of where they stayed last night) Number of times the client has been on the streets, in ES, or SH in the past three years including today
1	One Time
2	Two times
3	Three times
4	Four or more times
8	Client doesn't know
9	Client refused
99	Data not collected
Field 5 & Responses	Total number of months homeless on the street, in ES, or SH in the past three years
101	One month (this time is the first month)
102-112	(integers 2-12)
113	More than 12 months
8	Client doesn't know
9	Client refused
99	Data not collected
Element Type	Universal
Funder: Program- Component	All Programs – All Components which are typed as Street Outreach, Emergency Shelter or Safe Haven.
Project Type Applicability	1: Emergency Shelter 4: Street Outreach 8: Safe Haven
Data Collected About	Head of Household and Adults
Collection Point	Project Entry

Header	Instruction
System Logic	This element, 3.917A is required for all projects which are typed in the HMIS as Emergency Shelter (either night by night or entry/exit method), Street Outreach, and Safe Haven. No substitution in language or form may be made in this element. **This element requires no dependencies and all fields are to be visible and entered by the user.** Collect once at each project entry. System stores collected information as "project entry stage" information and retains for historical purpose. Updates not required, allow corrections for data entry errors. Updates are required only for persons aging into adulthood.
Other System Issues	The data contained in this element must be mapped over in all HMIS implementations from the former 3.9 and 3.17 elements. The internal field numbers for each of the fields and dependents contained within this element MUST be the same as the field numbers used for 3.917B.*
XML	<Enrollment><…>
CSV	Enrollment
2014 Version 5 Updates	Complete reworking of element. Element blends the old 3.9 *Residence Prior to Entry* with 3.17 *Time on the Streets, Emergency Shelter, or Safe Haven* in order to enable an HMIS to completely calculate an individual's/households status as Chronically homeless at entry and at a later point in time. Element has been divided into 3.917A and B based on the project type. 3.917A is applicable for persons entering project type: Street Outreach, Emergency Shelter, and Safe Haven while 3.917B is for persons entering all other project types.

3.917B Living Situation

For persons entering: Transitional Housing, any type of Permanent Housing, Services Only, Day Shelter, Homelessness Prevention, or Coordinated Entry Project

The logic for 3.917B is also described in the flow chart in Exhibit 1

Element Name		Living Situation
Field 1 & Responses		Type of Residence
Header: *HOMELESS SITUATION*		
	16	Place not meant for habitation
	1	Emergency shelter, including hotel or motel paid for with emergency shelter voucher
	18	Safe Haven
	27	Interim Housing

Element Name	Living Situation
Header: *INSTITUTIONAL SITUATION*	
15	Foster care home or foster care group home
6	Hospital or other residential non-psychiatric medical facility
7	Jail, prison or juvenile detention facility
24	Long-term care facility or nursing home
4	Psychiatric hospital or other psychiatric facility
5	Substance abuse treatment facility or detox center
Header: *TRANSITIONAL AND PERMANENT HOUSING SITUATION*	
14	Hotel or motel paid for without emergency shelter voucher
23	Owned by client, no ongoing housing subsidy
21	Owned by client, with ongoing housing subsidy
3	Permanent housing for formerly homeless persons (such as: a CoC project;
22	Rental by client, no ongoing housing subsidy
19	Rental by client, with VASH subsidy
25	Rental by client, with GPD TIP subsidy
20	Rental by client, with other ongoing housing subsidy
26	Residential project or halfway house with no homeless criteria
12	Staying or living in a family member's room, apartment or house
13	Staying or living in a friend's room, apartment or house
2	Transitional housing for homeless persons (including homeless youth)
8	Client doesn't know

9	Client refused
99	Data not collected
DEPENDENCIES FOR INSTITUTIONAL SITUATIIONS	
Field 2A – for Institutional Situations	Did you stay less than 90 days?
0	No
1	Yes
Dependency Logic	If No – no other response options required. If Yes – use Field #2 response options 10, 11, 2, 3 and go to Field 2C

Element Name	Living Situation
DEPENDENCIES FOR TRANSITIONAL and PERMANENT HOUSING SITUATIONS	
Field 2B – for Housing Situations	Did you stay less than 7 nights?
0	No
1	Yes
Dependency Logic	If No – no other response options required. If Yes – use Field #2 response options 10, 11, and go to Field 2C
DEPENDENCY FOR YES TO 2A OR 2B	
Field 2C – For yes to 2a or 2b	On the night before did you stay on the streets, ES or SH
0	No
1	Yes
Dependency Logic	If No – no other response options required. If Yes – go to Field 3, followed by Field 4 and then Field 5
ELEMENTS FOR CHRONIC HOMELESSNESS	
Field 3 & Responses	Approximate date homelessness started: (date) [date field]
Field 4 & Response	(Regardless of where they stayed last night) Number of times the client has been on the streets, in ES, or SH in the past three years including today
1	One Time
2	Two times
3	Three times
4	Four or more times
8	Client doesn't know
9	Client refused
99	Data not collected
Field 5 & Responses	Total number of months homeless on the street, in ES, or SH in the past three years
101	One month (this time is the first month)
102-112	(integers 2-12)
113	More than 12 months
8	Client doesn't know
9	Client refused
99	Data not collected
Funder: Program- Component	All Programs – All Components
Project Type Applicability	2: Transitional Housing 3: PH – Permanent Supportive Housing (disability required for entry) 6: Services Only 7: Other 9: PH – Housing Only 10: PH – Housing with Services (no disability required for entry) 11: Day Shelter

Element Name	Living Situation
	12: Homelessness Prevention 13: PH: Rapid Re-housing 14: Coordinated Assessment
Data Collected About	Head of Household and Adults
Collection Point	Project Entry
System Logic	This element, 3.917B, is required for all projects which are typed in the HMIS as any project type other than Emergency Shelter (either night by night or entry/exit method), Street Outreach, and Safe Haven. No substitution in language or form may be made in this element. Collect once at each project entry. System stores collected information as "project entry stage" information and retains for historical purpose. Updates not required, allow corrections for data entry errors. Element 3.917B may not be used by Emergency Shelter Street Outreach or Safe Haven projects in the HMIS. Updates are required only for persons aging into adulthood.
Other System Issues	The data contained in this element must be mapped over in all HMIS implementations from the former 3.9 and 3.17 elements. The HMIS must be able to create dependencies for this element. Data for the fields of this data element should be logically consistent. It is strongly recommended that the HMIS is programmed to enforce these rules or to notify users when inconsistent data has been entered. - If there is a "yes" response then the next response elements must be available for data entry. - If there is any other response then the next response element must either be hidden or darkened or in some other way identified as not to be completed. The internal field numbers for each of the fields and dependents contained within this element MUST be the same as the field numbers used for 3.917A
XML	<Enrollment><...>
CSV	Enrollment
2014 Version 5 Updates	Complete reworking of element. Element blends the old 3.9 Residence Prior to Entry with 3.17 Length of Stay on the Streets, Emergency Shelter, or Safe Haven in order to enable an HMIS to completely calculate an individual's/households status as Chronically homeless at entry and at a later point in time. Element has been divided into 3.917A and B based on the project type. 3.917A is applicable for persons entering project type: Street Outreach, Emergency Shelter, and Safe Haven while 3.917B is for persons entering all other project types.

3.10 Project Entry Date

Header	Instruction
Element Name	Project Entry Date
Field 1 & Response	Project Entry Date ([date field])
Element Type	Universal
Funder: Program- Component	All Programs – All Components
Project Type Applicability	All HMIS Project Types
Data Collected About	All Clients
Collection Point	Project Entry
System Logic	Collect once at each project entry. System stores collected information as "project entry stage" information and retains for historical purpose. Updates not required, allow corrections for data entry errors.
Other System Issues	The project entry date indicates a client has joined the project. • For residential projects, with the exception of PH-RRH project types, this is to be the date of entry into residency. • For PH-RRH project and non-residential projects it is the date on which the client was determined to be eligible for the project. • For Street Outreach projects it is the date of first contact with the client. For projects that have activities or information the project needs to collect prior to residential entry a project may have a "pre-entry" project also established or the vendor may develop another way to manage the information. The project entry date must be exportable in the [date field] format.
XML	<Enrollment><EntryDate>
CSV	Enrollment
2014 Version 5 Updates	None

3.11 Project Exit Date

Header	Instruction
Element Name	Project Exit Date
Field 1 & Response	Project Exit Date ([date field])
Element Type	Universal
Funder: Program- Component	All Programs – All Components
Project Type Applicability	All HMIS Project Types
Data Collected About	All Clients
Collection Point	Project Exit
System Logic	Collect once at each project exit. System stores collected information as "project exit stage" information and retains for historical purpose. Updates not required, allow corrections for data entry errors.
Other System Issues	The project exit date indicates a client has left the project. For residential projects this is the date of move out.

Header	Instruction
	For residential projects that have activities or information the project needs to collect after residential exit a project may have a separate "follow-up" project established or the vendor may develop another way to manage the information.
	For some "services-only" projects a record may need to remain open an indefinite period of time and an exit date recorded only when the client completes the service, is no longer in need of the service, has asked to be exited, or has gone missing.
	A client with an open record (i.e. project entry without a project exit) for a CoC defined "extensive length of time" in a shelter, outreach, or prevention program type may be either automatically exited from the project (exit date = date of auto exit) or may be flagged for user intervention and exit. The CoC must be involved in the determination of "extensive length of time" and to which projects the solution is to be applied. This may be accomplished via program setup functionality that may include a data field in each project's setup/profile to record the period of no client contact after which a client would be flagged for a default exit, or in any other manner the HMIS elects.
	For systems that require all shelter clients to reapply for service on a nightly basis, the project can enter the entry and exit date at the same time or can specify an HMIS solution that automatically enters the exit date as the day after the entry date for clients of the overnight project.
	If a client is in a project for a single day and has received some service but has not slept in a bed overnight (i.e., starts and stops before midnight of same day) the Project Exit Date may be the same as the Project Entry Date.
	The project exit date must be exportable in the [date field] format.
XML	<Exit><ExitDate>
CSV	Exit
2014 Version 5 Updates	None

3.12 Destination

Header	Instruction
Element Name	Destination
Field 1 & Responses	Destination Type
24	Deceased
1	Emergency shelter, including hotel or motel paid for with emergency shelter voucher
15	Foster care home or foster care group home
6	Hospital or other residential non-psychiatric medical facility
14	Hotel or motel paid for without emergency shelter voucher
7	Jail, prison or juvenile detention facility
25	Long-term care facility or nursing home

Header	Instruction

2014 Version 5 Updates	None

3.13 Personal ID

Header	Instruction
Element Name	Personal ID
Field 1 & Response	Personal ID (HMIS Generated)
Element Type	Universal
Funder: Program- Component	All Programs – All Components
Project Type Applicability	All HMIS Project Types
Data Collected About	All Clients
Collection Point	Record Creation
System Logic	Generate one. A Personal ID is an automatically generated identifier created by the HMIS application. A Personal ID must be permanent and unique to a single individual within an HMIS implementation.

A Personal ID must be created, but there is no required format as long as there is a single unique Personal ID for every client and it contains no personally identifying information. |
| Other System Issues | The Personal ID must be able to be attached to the same individual when served by multiple projects.

Search functionality must exist to facilitate linkage of the same person with their Personal ID as they are served by different projects within the continuum. There are multiple ways to accomplish this. The recommended method of search by users for clients in open record systems is for users to enter a combination of personal identifying information (Name, SSN, Date of Birth, and/or Gender) into the HMIS application and have the application search for matching records. If a match is found and a Personal ID is retrieved, the same Personal ID will be assigned to the client, i.e. the same record is used. If no matches are found, a new automatically generated Personal ID is assigned to the client. Variations or other methods may also be utilized by vendors as long as the system is designed to mitigate duplicate record entry.

HMIS must have functionality to allow the HMIS Lead to de-duplicate multiple records with distinct Personal ID's that are identified as representing the same individual based on identifying information. |
XML	<Client><PersonalID>
CSV	Client
2014 Version 5 Updates	None

3.14 Household ID

Header	Instruction
Element Name	Household ID
Field 1 & Response	Household ID (HMIS Generated)
Element Type	Universal
Funder: Program- Component	All Programs – All Components

Header	Instruction
Project Type Applicability	All HMIS Project Types
Data Collected About	All Clients
Collection Point	Project Entry
System Logic	A Household ID will be assigned to each household at each project entry and applies for the duration of that project stay to all members of the household served.
	The Household ID must be automatically generated by the HMIS application to ensure that it is unique. The Household ID has no meaning beyond a single enrollment; it is used in conjunction with the Project ID, Project Entry Date, and Project Exit Date to link records for household members together and indicate that they were served together.
	The Household ID is to be unique to the household stay in a project; reuse of the identification for the same or similar household upon readmission into the project is unacceptable.
Other System Issues	Persons may join a household with members who have already begun a project entry or may leave a project although other members of the household remain in the project. A common Household ID must be assigned to each member of the same household. Persons in a household (either adults or children) who are not present when the household initially applies for assistance and later join the household should be assigned the same Household ID that links them to the rest of the persons in the household. The early departure of a household member would have no impact on the Household ID.
	An HMIS may, but is not required to, utilize a Global Household ID at record creation upon initial entry into an HMIS based on the person(s) presenting together as a household at the time of initial entry. A Global Household ID is a value which spans an entire HMIS implementation representing a collection of persons who have been in a household together. Assignment of a client in or out of a global household at a specific project need not immediately affect the client's data at other projects. If, for example, one household member exits from a household in project A and that household is also being served in project B, there is no requirement to alter the household configuration at project B.
XML	<Enrollment><HouseholdID>
CSV	Enrollment
2014 Version 5 Updates	None

3.15 Relationship to Head of Household

Header	Instruction
Element Name	Relationship to Head of Household
Field 1 & Responses	Relationship to Head of Household
1	Self
2	Head of household's child
3	Head of household's spouse or partner
4	Head of household's other relation member (other relation to head of household)
5	Other: non-relation member
Element Type	Universal

Header	Instruction
Funder: Program-Component	All Programs – All Components
Project Type Applicability	All HMIS Project Types
Data Collected About	All Clients
Collection Point	Project Entry
System Logic	Collect once at each project entry. System stores collected information as "project entry stage" information and retains for historical purpose. Data is time sensitive and may change over the project stay. System must allow for updated information collection if change occurs and must record the date the information was collected as "update stage" information and retains all updates for historical purpose.

There must be one and only one individual for whom Relationship to Head of Household is 'Self (head of household)' for each project entry.

In the event that the individual designated as head of household exits the project while other members remain, users must be able to edit the Relationship to Head of Household for all household members such that an individual present for the entire enrollment is designated as head of household and relationships to the head are correct for other members (including the individual exiting the program).

All members of the household accepted into a specific housing project or applicable to a service project are recorded within an HMIS and must either be the Head of Household or have an identified relationship to the Head of Household. |
| Other System Issues | The term Head of Household is not intended to mean the leader of the house, rather it is to identify one client by which to attach the other household members.

There are no requirements for the identification of the Head of Household established within these standards. Continuums may elect a method of identification and/or funders may have a preference.

It is expected that both the Head of Household and the household member are always in the database together in the same household at a particular project

The system must allow for the Head of Household to leave the household and have the household maintain the same Household ID while assigning a new Head of Household.

The system must allow for persons to enter or exit the household without having to complete a full program exit and new project entry of the entire household. |
XML	<Enrollment><RelationshipToHoH>

2014 Version 5 Updates	None

3.16 Client Location

Header	Instruction
Element Name	Client Location
Information Date	(date)
Field 1 & Response	HUD assigned CoC code for the client's location
Element Type	Universal

Header	Instruction
Funder: Program- Component	All Programs – All Components
Project Type Applicability	All HMIS Project Types
Data Collected About	Head of Household
Collection Point	Project entry and update
System Logic	Continuum of Care Code must be collected by all projects with more than one Continuum of Care Code identified in Project Descriptor Data Element 2.3. Collect once at each project entry. System stores collected information as "project entry stage" information and retains for historical purpose. Data is time sensitive and may change over the project stay. System must allow for updated information collection if change occurs and must record the date the information was collected as "update stage" information and retains all updates for historical purpose.
Other System Issues	In order to allow projects operating in multiple continuums to enter data into a single 'host' HMIS and provide data to each of the continuums in which they are serving clients, a continuum must be identified for each project entry. The Continuum of Care Code will be used in continuum reporting in the host HMIS to exclude irrelevant data; it will also be used as a parameter for data export in order to provide relevant data to other continuums. Data are to indicate the location of the client's current residence and must be updated if the client moves into a different CoC. Household data will have to move based on the Head of Household's identified location. Systems may set up defaults to the continuum code of the HMIS implementation, but must be able to accept any other continuum code identified in data element 2.3 for the project. For data quality it is recommended that the CoC codes used for this element should be limited to the same CoC codes used for element 2.3 Continuum of Care Code.
XML	<EnrollmentCoC>
CSV	EnrollmentCoC
2014 Version 5 Updates	None

PROGRAM-SPECIFIC DATA ELEMENTS

Program-Specific Data Elements provide information about the characteristics of clients, the services that are provided, and client outcomes. The HMIS Federal Partners have cooperatively developed these elements. Some of the program specific data elements are collected across all federal partner programs. Others are limited to a single federal partner program or even further to a single component of one of the federal partner programs. Program specific guidance will be issued through HUD in cooperation with their partner programs for each of the federal partner programs utilizing HMIS that will provide users the specific guidance the federal program requires on each applicable element.

An HMIS must have the ability to enable and restrict visibility of elements based on the funding needs of the program. An HMIS may do this in whatever manner they choose (hard coding, customization via system administrators, etc.). HMIS vendors should note that no federal partner expects that any project would have all elements visible to the user. The preference among the federal partners is that only the program specific elements required for the programs that fund a specific project are visible to the user.

The Program-Specific Data Elements that are required for federal reporting include elements that are used by more than one federal funder program:

4.1 Housing Status
4.2 Income and Sources
4.3 Non-Cash Benefits
4.4 Health Insurance
4.5 Physical Disability
4.6 Developmental Disability
4.7 Chronic Health Condition
4.8 HIV/AIDS
4.9 Mental Health Problem

4.10 Substance Abuse
4.11 Domestic Violence
4.12 Contact
4.13 Date of Engagement
4.14E Bed Night
4.17 Residential Move-in Date
4.18 Housing Assessment Disposition
4.19 Housing Assessment at Exit

Program-Specific Data Elements that have been developed by one of the federal partners and are only required for their use are:

HHS-PATH Only Required Elements
4.14A Services Provided – PATH Funded
4.16A Referrals Provided - PATH

4.20 Path Status
4.21 Connection with SOAR

HHS-RHY Only Required Elements
4.14B Services Provided – RHY
4.16B Referrals Provided - RHY
4.22 RHY-BCP Status
4.23 Sexual Orientation
4.24 Last Grade Completed
4.25 School Status
4.26 Employment Status
4.27 General Health Status
4.28 Dental Health Status
4.29 Mental Health Status
4.30 Pregnancy Status

4.31 Formerly a Ward of Child Welfare/Foster Care Agency
4.32 Formerly a Ward of Juvenile Justice System
4.33 Yong Persons' Critical Issues
4.34 Referral Source
4.35A Commercial Sexual Exploitation
4.35B Labor Exploitation
4.36 Transitional, Exit care or Aftercare Plan and Actions
4.37 Project Completion Status
4.38 Family Reunification Achieved

HUD-HOPWA Required Elements
4.14C Services Provided – HOPWA
4.15A Financial Assistance Provided – HOPWA

4.39 Medical Assistance
4.47 T-cell (CD4) and Viral Load

HUD-RHSAP Required Elements
4.40 Worst Housing Situation

VA-SSVF Required Elements
4.14D Services Provided – VA
4.15B Financial Assistance Provided – VA
4.43 Last Permanent Address
4.45 VAMC Station Number

4.41 Veteran's Information
4.42 Percent of AMI
4.48 SSVF HP Targeting Criteria
4.49 Use of Other Crisis Services

For each Program-Specific Data Element, multiple response categories are provided. Projects may choose to capture more detailed information (or finer response categories) as long as this information can be exactly mapped to the required response categories described in this section. For reporting purposes, an HMIS must be able to produce required report using the response categories exactly as they are presented in this section.

4.1 Housing Status

Header	Instruction
Element Name	Housing Status
Field 1 & Responses	Homelessness and At-Risk of Homelessness Status
1	Category 1 - Homeless
2	Category 2 - At imminent risk of losing housing
5	Category 3 - Homeless only under other federal statutes
6	Category 4 - Fleeing domestic violence
3	At-risk of homelessness
4	Stably Housed
8	Client doesn't know
9	Client refused
99	Data not collected
Element Type	Program Specific
Funder: Program-Component	HUD:CoC – No component requires data collection
	HUD:ESG – No component requires data collection
	HUD:HOPWA – Collection required for all components
	HUD: HUD-VASH - No component requires data collection
	HUD:RHSAP - Collection required for all components
	HHS: PATH – Collection required for all components
	HHS:RHY – No component requires data collection
	VA:SSVF – No component requires data collection
Project Type Applicability	All HMIS Project Types
Data Collected About	Heads of Households and Adults
Collection Point	Project Entry
System Logic	Collect once at each project entry. System stores collected information as "project entry stage" information and retains for historical purpose. Updates not required, allow corrections for data entry errors. If the project collecting the data houses homeless and non-homeless persons in the same project AND uses HMIS for its Point-In-Time count, then data collection is required for ALL persons, not just the Head of Household and Adults.

	HUD:ESG – Collection required for all components except ES-nbn
	HUD:HOPWA – Collection required for all components
	HUD:HUD-VASH - Collection required for all components
	HUD:RHSAP - Collection required for all components
	HHS:PATH–Collection required for all components
	HHS:RHY – Collection only required for MGH, TLP and Demo
	VA:SSVF – Collection required for all components
Project Type Applicability	All HMIS Project Types
Data Collected About	Heads of Households and Adults
Collection Point	Project Entry, Update, Annual Assessment, and Project Exit
System Logic	The system must record the appropriate collection stage for each element. Systems must also allow for update information if a change occurs mid-year. Allow corrections for data entry errors at all stages.
Other System Issues	Data for the fields of this data element should be logically consistent. It is recommended that the HMIS is programmed to enforce these rules or to notify users when inconsistent data has been entered. • If there is a "yes" response to "Income from any source" then at least one source of income must be identified. • If a source is identified then a "Monthly amount" must be entered. • If a "Monthly amount" is entered for any source then a "Total monthly income" amount is required. • If there is a "no" to Response 2 "Income from any source" then the HMIS must automatically record all sources as "no" and leave dollar amounts null or $0.00. Note: When a client has income, but does not know the exact amount, a 'Yes' response should be recorded for both the overall income question and the specific source, and the income amount should be estimated. To reduce data collection and reporting burden • Systems are encouraged to auto-calculate total monthly income to avoid mathematical errors and reduce data collection (generate a $0.00 for total monthly income if "Income from any source" = "no") • If a client reports receiving income, an HMIS may be designed such that projects only need to directly enter "yes" for the income source the client receives and have the HMIS automatically generate a "no" response for the other income sources.

Header	Instruction
	The HMIS may facilitate data accuracy by automatically changing a "no" in "income from any source" to a "yes" if source(s) and dollar amount(s) are indicated.
	Updates are required for persons aging into adulthood.
	The income amounts recorded in an HMIS in Income and Sources do not necessarily equate to documentation of income for "rent calculation" purposes. A rental calculation may not be estimated and has additional sources. Vendors may elect to develop rent calculation tools but should not rely on the income and sources fields for calculations.
XML	<IncomeAndSources>

Funder: Program- Component	HUD:CoC – Collection required for all components
	HUD:ESG – Collection required for all components except ES-nbn
	HUD:HOPWA – Collection required for all components
	HUD:HUD-VASH - Collection required for all components
	HUD:RHSAP - Collection required for all components
	HHS:RHY – Collection only required for MGH, TLP and Demo
	HHS:PATH –Collection required for all components
	VA:SSVF – Collection required for all components
Project Type Applicability	All HMIS Project Types
Data Collected About	Heads of Households and Adults
Collection Point	Project Entry, Update, Annual Assessment, and Project Exit
System Logic	The system must record the appropriate collection stage for each element. Systems must also allow for update information if a change occurs mid-year. Allow corrections for data entry errors at all stages.
Other System Issues	Data for the fields of this data element should be logically consistent. It is recommended that the HMIS is programmed to enforce these rules or to notify users when inconsistent data has been entered. • If there is a "yes" response to "Non-cash benefits from any source" then at least one source of non-cash benefit must be identified. • If there is a "no" response to "Non-cash benefit from any source" then the HMIS must automatically record all sources as "no". To reduce data collection and reporting burden • If a client reports receiving non-cash benefits, an HMIS may be designed such that projects only need to directly enter "yes" for the benefit source the client receives and have the HMIS automatically generate a "no" response for the other benefit sources. The HMIS may facilitate data accuracy by automatically changing a "no" in "Receiving non-cash benefits from any source" to a "yes" if source(s) are indicated. Updates are required for persons aging into adulthood.

Header	Instruction
	Non-cash benefits may be entered into more detailed categories as long as these categories can be aggregated into the above-stated non-cash benefits. Format clarification provided that each non-cash benefit source is its own field.

Funder: Program- Component	HUD: CoC – Collection required for all components
	HUD:ESG – Collection required for all components except ES-nbn
	HUD:HOPWA – Collection required for all components
	HUD:HUD-VASH - Collection required for all components
	HUD:RHSAP - Collection required for all components
	HHS:PATH – Collection required for all components
	HHS:RHY – Collection required for all components
	VA:SSVF – Collection required for all components
Project Type Applicability	All HMIS Project Types
Data Collected About	All clients
Collection Point	Project Entry, Update, Annual Assessment, and Project Exit
System Logic	The system must record the appropriate collection stage for each element. Systems must also allow for update information if a change occurs mid-year. Allow corrections for data entry errors at all stages.
Other System Issues	Data for the fields of this data element should be logically consistent. It is recommended that the HMIS is programmed to enforce these rules or to notify users when inconsistent data has been entered. - If there is a "yes" response to "Covered by health insurance" then at least one source of health insurance must be identified. - If there is a "no" response to "Covered by health insurance" then the HMIS must automatically record all sources as "no".

Element Name	Health Insurance
	To reduce data collection and reporting burden • If a client reports "Covered by health insurance" as "yes" an HMIS may be designed such that projects only need to directly enter "yes" for the health insurance received. The HMIS may automatically generate a "no" response for the other non-cash benefit sources. The HMIS may facilitate data accuracy by automatically changing a "no" in "Covered by health insurance" to a "yes" if source(s) are indicated.

4.13 Date of Engagement

Header	Instruction
Element Name	Date of Engagement

Header	Instruction
Field 1 & Response	Date of Engagement (date) [date field]
Element Type	Program Specific
Funder: Program- Component	HUD:CoC – Collection only required for Street Outreach
	HUD:ESG – Collection only required for Street Outreach and ES - nbn
	HUD:HOPWA – No component requires data collection
	HUD:HUD-VASH - No component requires data collection
	HUD:RHSAP - No component requires data collection
	HHS:PATH – Collection required for all components
	HHS: RHY – Collection only required for Street Outreach
	VA:SSVF – No component requires data collection
Project Type Applicability	1:Emergency Shelter – night by night method only
	4:Street Outreach
	6:Services Only
Data Collected About	Heads of Households and Adults
Collection Point	Update
System Logic	Only one date of engagement is allowed between the project entry date and project exit date.
Other System Issues	If a client returns to the project at a later date the previous date of engagement does not apply to the new project entry. The client must be re-entered based on the new project entry and project exit date service period. It is also possible that a case may be closed without the client becoming engaged and thus null in that client record.
XML	<Enrollment>

	HUD:ESG – No component requires data collection					
	HUD:HOPWA – No component requires data collection					
	HUD:HUD-VASH - No component requires data collection					
	HUD:RHSAP - No component requires data collection					
	HHS:PATH – Collection required for all components					
	HHS: RHY – No component requires data collection					
	VA:SSVF – No component requires data collection					
Project Type Applicability	4: Street Outreach					
	6: Services Only					
Data Collected About	Heads of Households and Adults					
Collection Point	As provided - update					
System Logic	Data are time sensitive and may change over the project stay. System must allow for updated information collection as change occurs and must record the date the information was collected as "update stage" information and retains all updates for historical purpose.					
Other System Issues	The data in this element are transactional data; each time the service is delivered a record of the date of service and the service element must be maintained. If a service benefits the entire household, it must be recorded for the Head of Household. PATH only records services that are PATH funded. If providers want to collect other services provided, then a separate element must be created to distinguish PATH funded services from non-PATH funded services. PATH only will report on persons who received services who are enrolled.					
XML	<Services>					
CSV	Services					
2014 Version 5 Updates	Field 2 response options have changed: "Outreach" has changed to "Reengagement"; "Screening/assessment response" was split into two responses; "Housing technical assistance" changed to "Housing eligibility determination" and "Other PATH-funded service" was removed.

4.14E Services Provided - Bed-night Date

Header	Instruction
Element Name	Bed Night Date
Field 1 & Response	Bed Night Date (date) [date field]
Element Type	Program Specific
Funder: Program- Component	HUD:CoC – No component requires data collection
	HUD:ESG – Collection required for all ES component
	HUD:HOPWA – No component requires data collection
	HUD:HUD-VASH - No component requires data collection
	HUD:RHSAP - No component requires data collection
	HHS:PATH – No component requires data collection
	HHS: RHY – No component requires data collection
	VA:SSVF – No component requires data collection
Project Type Applicability	1: Emergency Shelter - nbn method (Applicability extends to all nbn method shelters that are not funded through ESG but also participate in HMIS.)
Data Collected About	All Clients
Collection Point	Project Entry and as provided
System Logic	Collect once for each bed night utilized.
Other System Issues	A bed night date indicates that the client has utilized a bed in a night-by-night shelter on that date. The system must be able to store a theoretically unlimited number of bed night dates for any Project Entry ID associated with a night-by-night shelter. There must be a record of a bed night on the project entry date into the shelter; any additional bed night dates must be after the project entry date and *before* the project exit date. The bed-night date must be exportable in the [date field] format.

Dependent A – Dependent to Field 2 & Responses 1-10	*If any "Type of Referral" made* Select Outcome for each
1	Attained
2	Not attained
3	Unknown
Element Type	Program Specific
Funder: Program- Component	HUD:CoC – No component requires data collection HUD:ESG – No component requires data collection HUD:HOPWA – No component requires data collection HUD:HUD-VASH - No component requires data collection HUD:RHSAP - No component requires data collection HHS:PATH – Collection required for all components HHS: RHY – No component requires data collection VA:SSVF – No component requires data collection
Project Type Applicability	4: Street Outreach 6: Services Only
Data Collected About	Heads of Households and Adults
Collection Point	As provided - update
System Logic	Data are time sensitive and may change over the project stay. System must allow for updated information collection as change occurs, must record the date the information was collected as "update stage" information and retains all updates for historical purpose.
Other System Issues	The data in this element are transactional data; each time there is a referral a record of the referral must be recorded. Multiple types of the same referral may be made over the course of project enrollment. Each referral should have an outcome response. Referral outcome is being shown as a dependent response. However, the responses of attained, not attained, or unknown may have better ways of presentation for data collection than as dependent fields as the response may not be known simultaneous with identification of the referral. Vendors may elect means other than a dependent field to improve data quality. The information is required on reporting. PATH only will report on persons who received services who are enrolled.
XML	<Services>
CSV	Services

Header	Instruction
2014 Version 5 Updates	Field 2 response options have changed: "Primary health care" changed to "Primary health/dental care"; "Relevant housing services changed to "Housing services" "Housing placement assistance" was changed into "Permanent Housing" and "Temporary Housing" was added; Medical assistance" was changed to "Medical Insurance". Collection of data related to referrals to job training, educational services, and housing services are optional response options, not required.

Project Type Applicability	1: Emergency Shelter 2: Transitional Housing 6: Services Only

Header	Instruction
	12: Homelessness Prevention
Data Collected About	Heads of Households, Adults and Unaccompanied Youth
Collection Point	As provided - update
System Logic	Data are time sensitive and may change over the project stay. System must allow for updated information collection as change occurs, must record the date the information was collected as "update stage" information and retains all updates for historical purpose.
Other System Issues	The data in this element are transactional data; each time there is a referral a record of the referral must be recorded. Multiple types of the same referral may be made over the course of project enrollment.
XML	<Services>
CSV	Services
2014 Version 5 Updates	Data collection has been streamlined from requiring the information be collected at each instance of referral to only collecting a referral type received once during the project enrollment.

4.17 Residential Move-In Date

Header	Instruction
Element Name	Residential Move-In Date
Field 1 & Response	Residential Move-in Date (date)
Element Type	Program Specific
Funder: Program- Component	HUD: CoC – Collection required for RRH only HUD: ESG – Collection required for RRH only HUD: HOPWA – No component requires data collection HUD: HUD-VASH - No component requires data collection HUD: RHSAP - No component requires data collection HHS: PATH – No component requires data collection HHS: RHY – No component requires data collection VA: SSVF – Collection required for RRH only
Project Type Applicability	13: PH-Rapid Re-Housing
Data Collected About	Heads of Household
Collection Point	When an RRH household moves into permanent housing
System Logic	Residential Move-In Date must be between the Project Entry Date and Project Exit Date. There should be one and only one record of this data element per enrollment.
Other System Issues	For purposes of the Housing Inventory Count and other point-in-time reporting, RRH households should be excluded from counts of persons in permanent housing when there is no Residential Move-In Date or when it is after the date of the count. Some systems have implemented separate 'Services only' pre-entry projects for RRH clients who are not yet in permanent housing; in these cases, clients

Header	Instruction
	are exited from the 'Services only' pre-entry project and entered into the RRH project only if/when a household moves into permanent housing. With this configuration:
	- Reporting <u>must be able</u> to link data in the services-only project to data in the RRH project in a manner that accurately reflects the entire RRH period of service. - Data element 2.4 Project Type could be utilized for this purpose by specifying that the Services Only project is affiliated with the RRH project. - Any HMIS standard export of data must combine data from separate enrollments into a single RRH enrollment. - Reporting or export of project entry data should be based solely on data collected at the first project entry. - Reporting or export of exit data must be: based on exit data from the first enrollment for clients who are not in permanent housing at the time of exit; or based on the second exit for clients who do move in to permanent housing. - For clients who move into permanent housing, exit data from the first project and entry data from the second should either be excluded from reporting/export or identified with a data collection point of 'Project update.
XML	<ResidentialMoveInDate>
CSV	Enrollment
Updates from 2014 Version 3	Information date has been removed; where 'In permanent housing' is 'No,' the effective information date is the project entry date. Where 'In permanent housing' is 'Yes,' the effective information date is the residential move-in date. In systems currently set up to create multiple records per enrollment, an information date would be necessary to identify the most recent record, which is the record which must be used for reporting / export purposes. Guidance related to collection point and alternative means of capturing data has been updated.

4.18 Housing Assessment Disposition

Header	Instruction
Element Name	Housing Assessment Disposition
Field 1 & Responses	Assessment Disposition
1	Referred to emergency shelter/safe haven
2	Referred to transitional housing
3	Referred to rapid re-housing

Header	Instruction
4	Referred to permanent supportive housing
5	Referred to homelessness prevention
6	Referred to street outreach
7	Referred to other continuum project type
8	Referred to a homelessness diversion program
9	Unable to refer/accept within continuum; ineligible for continuum projects
10	Unable to refer/accept within continuum; continuum services unavailable
11	Referred to other community project (non-continuum)
12	Applicant declined referral/acceptance
13	Applicant terminated assessment prior to completion
14	Other/specify
Dependent A – Dependent to Field 1 & Response 14	*If Other/ specify for "Assessment Disposition"* Text box
Element Type	Program Specific
Funder: Program- Component	HUD:CoC – Collection required for all components which provide Coordinated Assessment HUD:ESG – Collection required for all components which provide Coordinated Assessment HUD:HOPWA – No component requires data collection HUD:HUD-VASH - No component requires data collection HUD:RHSAP - No component requires data collection HHS:PATH – No component requires data collection HHS: RHY – No component requires data collection VA:SSVF – No component requires data collection
Project Type Applicability	14 – Coordinated Assessment (or other deepening on CoC design of Coordinated Assessment system)
Data Collected About	Head of Household
Collection Point	Project Exit
System Logic	Collect once at or by project exit or when the information is known. System stores collected information as "project exit stage" information and retains for historical purpose. Updates not required, allow corrections for data entry errors.
Other System Issues	Unknown
XML	<HousingAssessmentDisposition>
CSV	Exit
2014 Version 5 Updates	None

4.19 Housing Assessment at Exit

Header	Instruction
Element Name	Housing Assessment at Exit
Field 1 & Responses	Housing Assessment at Exit
1	Able to maintain the housing they had at project entry
2	Moved to new housing unit

Header	Instruction
3	Moved in with family/friends on a temporary basis
4	Moved in with family/friends on a permanent basis
5	Moved to a transitional or temporary housing facility or program
6	Client became homeless – moving to a shelter or other place unfit for human habitation
7	Client went to jail/prison
10	Client died
8	Client doesn't know
9	Client refused
99	Data not collected
Dependent A – Dependent to Field 1 & Response 1	*If Able to maintain the housing they had at project entry for "Housing Assessment at Exit"* Subsidy information
1	Without a subsidy
2	With the subsidy they had at project entry
3	With an on-going subsidy acquired since project entry
4	Only with financial assistance other than a subsidy
Dependent B – Dependent to Field 1 & Response 2	*If Moved to new housing unit for "Housing Assessment at Exit"* Subsidy information
1	With on-going subsidy
2	Without an on-going subsidy

PATH REQUIRED ELEMENTS

4.20 PATH Status

Header	Instruction
Element Name	PATH Status
Field 1 & Response	Date of Status Determination (date) [date field]
Field 2 & Responses	Client Became Enrolled in PATH
0	No
1	Yes
Dependent A – Dependent to Field 2 & Response 0	*If No for "Client Became Enrolled in PATH"* Reason not enrolled
1	Client was found ineligible for PATH
2	Client was not enrolled for other reason(s)
Element Type	Program Specific
Funder: Program- Component	HUD:CoC – No component requires data collection HUD:ESG – No component requires data collection HUD:HOPWA – No component requires data collection HUD:HUD-VASH - No component requires data collection HUD:RHSAP - No component requires data collection HHS:PATH – Collection required for all components HHS: RHY – No component requires data collection VA:SSVF – No component requires data collection
Project Type Applicability	4: Street Outreach 6: Services Only
Data Collected About	Head of Household and adults
Collection Point	Update (Collect once at or before exit when the status is determined.)
System Logic	Collect once at or before each project exit. System stores collected information as "update" information and retains for historical purpose. Updates not required, allow corrections for data entry errors.
Other System Issues	Only one PATH status date and response is allowed for each project stay. If a client returns to the project at a later date the previously entered data does not apply and a new response must be entered based on this new project entry and project exit date service period. If the HMIS supports requiring elements, then this element and its dependent response should be required for PATH and the client should not be able to be exited without a response to this element. This element is critical to PATH reporting.
XML	<PATHStatus>
CSV	Enrollment
2014 Version 5 Updates	None

4.21 Connection with SOAR

Header	Instruction
Element Name	Connection with SOAR
Field 1 & Responses	Connection with SOAR
0	No
1	Yes
8	Client doesn't know
9	Client refused
99	Data not collected
Element Type	Program Specific
Funder: Program- Component	HUD:CoC – No component requires data collection HUD:ESG – No component requires data collection HUD:HOPWA – No component requires data collection HUD:HUD-VASH - No component requires data collection HUD:RHSAP - No component requires data collection HHS:PATH – Collection required for all components HHS: RHY – No component requires data collection VA:SSVF – No component requires data collection
Project Type Applicability	4:Street Outreach 6:Services Only
Data Collected About	Head of Household and Adults
Collection Point	Project Entry, Update, Annual Assessment and Exit.
System Logic	The system must record the appropriate collection stage for each element. Systems must also allow for update information if a change occurs mid-year. Allow corrections for data entry errors at all stages.
Other System Issues	If the SOAR program is locally available CoC's may find this element helpful to their CoCs for implementation in programs other than PATH.
XML	<ConnectionWithSOAR>
CSV	Exit
2014 Version 5 Updates	Element now required for all HHS: PATH Components. Data collection now required at Project Entry, Update, Annual Assessment, and Project Exit.

RHY REQUIRED ELEMENTS

4.22 RHY – BCP Status

Header	Instruction
Element Name	RHY – BCP Status
Field 1 & Response	Date of Status Determination (date) [date field]
Field 2 & Responses	FYSB Youth
0	No
1	Yes
Dependent A – Dependent to Field 2 & Response 0	*If No for "FYSB Youth"* Reason for not providing services
1	Out of age range

4	Other
Element Type	Program Specific
Funder: Program- Component	HUD:CoC – No component requires data collection HUD:ESG – No component requires data collection HUD:HOPWA – No component requires data collection HUD:HUD-VASH - No component requires data collection HUD:RHSAP - No component requires data collection HHS:PATH – No component requires data collection HHS: RHY – Collection required for BCP only VA:SSVF – No component requires data collection
Project Type Applicability	1:Emergency Shelter – e/e method 12:Homelessness Prevention
Data Collected About	All clients
Collection Point	Update (Collect once before exit.)
System Logic	Collect once at or before each project exit. System stores collected information as "update" information and retains for historical purpose. Updates not required, allow corrections for data entry errors.
Other System Issues	Only one RHY status date and only one response for "FYSB Youth" is allowed for each project stay. If a client returns to the project at a later date the previous data does not apply and must be entered based on this project entry and project exit date service period. If the system supports required elements, then this element should be required for RHY:BCP-es funded projects and the client should not be able to exit the project without a response to this element. When counting a Basic Center Program Shelter for inclusion in the Housing Inventory Count and RHY reporting, persons identified as FYSB Youth – "No" should be excluded from counts of persons served.

4.30 Pregnancy Status

Header	Instruction
Element Name	Pregnancy Status
Field 1 & Responses	Pregnancy Status
0	No
1	Yes
8	Client doesn't know
9	Client refused
99	Data not collected
Dependent A – Dependent to Field 2 & Response 1	*If Yes for "Pregnancy Status"* Due Date (date) [date field]
Element Type	Program Specific

Header	Instruction
Funder: Program-Component	HUD:CoC – No component requires data collection
	HUD:ESG – No component requires data collection
	HUD:HOPWA – No component requires data collection
	HUD:HUD-VASH - No component requires data collection
	HUD:RHSAP - No component requires data collection
	HHS:PATH – No component requires data collection
	HHS: RHY – Collection required for all components
	VA:SSVF – No component requires data collection
Project Type Applicability	1: Emergency Shelter
	2: Transitional Housing
	4: Street Outreach
	12: Homelessness Prevention
Data Collected About	Female - Head of Household, Adults, and Unaccompanied Youth
Collection Point	Project Entry and Update
System Logic	Collect once at each project entry. Data are time sensitive and may change over the project stay. System must allow for updated information collection as change occurs, must record the date the information was collected as "update stage" information and retains all updates for historical purpose.
Other System Issues	The data in this element are transactional data; each time there is pregnancy a record of the pregnancy must be recorded.
	If Due Date is unknown, default to January first of current year.

1	Medical Report
2	Client report
3	Other
Element Type	Program Specific

Header	Instruction
Funder: Program-Component	HUD:CoC – No component requires data collection HUD:ESG – No component requires data collection HUD:HOPWA – Collection required for all components HUD:HUD-VASH - No component requires data collection HUD:RHSAP - No component requires data collection HHS:PATH – No component requires data collection HHS: RHY – No component requires data collection VA:SSVF – No component requires data collection
Project Type Applicability	1: Emergency Shelter 2: Transitional Housing 3: PH-Permanent Supportive Housing 6: Services Only 12: Homelessness Prevention
Data Collected About	Only Clients funded in a HOPWA project presenting with HIV/AIDS
Collection Point	Project Entry, Update, Annual Assessment and Project Exit
System Logic	Collect at project entry and project exit. Data should be updated every 6 months following project entry thru to project exit and at a minimum at Annual Assessment. The system must record the appropriate collection stage for each element. Systems must also allow for update information if a change occurs mid-year. Allow corrections for data entry errors at all stages.
Other System Issues	It is recommended that an HMIS only display this question as dependent to HMIS Data Standards Element 4.8 (HIV/AIDS) where the response is "yes" (1). If possible the system should limit the numeric range of the "viral load information available" – response option 1 "available" to 21 to 999,999 as a response of 20 or less is associated with an "undetectable "viral load.
XML	<TCellViralLoad>
CSV	Disabilities
2014 Version 5 Updates	Response options changed in Field 3: from "yes/no" to "Undetectable", "Not Available", and "Available"

4.48 SSVF HP Targeting Criteria

Header		Instruction
Field 1 & Responses		Referred by Coordinated Entry or a homeless assistance provider to prevent the household from entering an emergency shelter or transitional housing or from staying in a place not meant for human habitation.
	0	No (0 points)
	1	Yes
Field 2 & Responses		Current housing loss expected within…
	0	0-6 days
	1	7-13 days
	2	14-21 days
	3	More than 21 days (0 points)
Field 3 & Responses		Current household income is $0
		No (0 points)
		Yes
Field 4 & Responses		Annual household gross income amount
	0	0-14% of Area Median Income (AMI) for household size
	1	15-30% of AMI for household size
	2	More than 30% of AMI for household size (0 points)
Field 5 & Responses		Sudden and significant decrease in cash income (employment and/or cash benefits) AND/OR unavoidable increase in non-discretionary expenses (e.g., rent or medical expenses) in the past 6 months
	0	No (0 points)
	1	Yes
Field 6 & Responses		Major change in household composition (e.g., death of family member, separation/divorce from adult partner, birth of new child) in the past 12 months
	0	No (0 points)
	1	Yes
Field 7 & Responses		Rental Evictions within the Past 7 Years
	0	4 or more prior rental evictions
	1	2-3 prior rental evictions
	2	1 prior rental eviction

Header	Instruction
3	No prior rental evictions (0 points)
Field 8 & Responses	Currently at risk of losing a tenant-based housing subsidy or housing in a subsidized building or unit
0	No (0 points)
1	Yes
Field 9 & Responses	History of Literal Homelessness (street/shelter/transitional housing)
0	4 or more times or total of at least 12 months in past three years
1	2-3 times in past three years
2	1 time in past three years
3	None (0 points)
Field 10 & Responses	Head of household with disabling condition (physical health, mental health, substance use) that directly affects ability to secure/maintain housing
0	No (0 points)
1	Yes
Field 11 & Responses	Criminal record for arson, drug dealing or manufacture, or felony offense against persons or property
0	No (0 points)
1	Yes
Field 12 & Responses	Registered sex offender
0	No (0 points)
1	Yes
Field 13 & Responses	At least one dependent child under age 6
0	No (0 points)
1	Yes
Field 14 & Responses	Single parent with minor child(ren)
0	No (0 points)
1	Yes
Field 15 & Responses	Household size of 5 or more requiring at least 3 bedrooms (due to age/gender mix)
0	No (0 points)
1	Yes
Field 16 & Responses	Any Veteran in household served in Iraq or Afghanistan
0	No (0 points)
1	Yes
Field 17 & Responses	Female Veteran
0	No (0 points)
1	Yes
Field 20 & Response	HP applicant total points (integer)
Field 21 & Response	Grantee targeting threshold score (integer)
Element Type	Program-Specific

4.33	Young Person's Critical Issues	x	x	x		x	x
4.34	Referral Source	x	x	x		x	x
4.35A	Commercial Sexual Exploitation	x	x	x	x	x	x
4.35B	Commercial Labor Exploitation	x	x	x	x	x	x
4.36	Transitional, Exit-care, or Aftercare Plan and Actions	x	x	x		x	x
4.37	Project Completion Status	x	x	x		x	x
4.38	Family Reunification Achieved	x	x	x		x	x

2014 Version 5 Updates: 1) Element 4.24 has additional response options: "Associate's degree", "Bachelor's degree", "Graduate degree" and "Vocational certification".

4-3 HUD:CoC Program Specific Element Visibility – Collection Requirements

The elements shown are only those in which at least one CoC program component is required to collect information.

X = data collection is required

* = data collection is required only for Supportive Services Only components which are funded to provide Street Outreach

? = data collection is determined by how the CoC has structured the coordinated assessment in their area. Placement of the element would be required for any project that is conducting a coordinated assessment. This may be across multiple projects or sited in a central access point or coordinated intake center.

Number	Element	Homelessness Prevention	Permanent Supportive Housing	Rapid Re-Housing	Supportive Services Only	Transitional Housing
4.2	Income and Sources	x	x	x	x	x
4.3	Non-Cash Benefits	x	x	x	x	x
4.4	Health Insurance	x	x	x	x	x
4.5	Physical Disability	x	x	x	x	x
4.6	Developmental Disability	x	x	x	x	x
4.7	Chronic Health Condition	x	x	x	x	x
4.8	HIV/AIDS	x	x	x	x	x
4.9	Mental Health Problem	x	x	x	x	x
4.10	Substance Abuse	x	x	x	x	x
4.11	Domestic Violence	x	x	x	x	x
4.12	Contact				*	
4.13	Date of Engagement				*	
4.17	Residential Move-in Date			x		
4.18	Housing Assessment Disposition	?	?	?	?	?
4.19	Housing Assessment at Exit	x				

2014 Version 5 Updates: 1) Element 4.4 was updated to include "Indian Health Services Program" and "Other" as response options. 2) Element 4.17 was reconfigured to only collect the date in which a person moves into permanent housing.

4-4 HUD:ESG Program Specific Element Visibility – Collection Requirements

The elements shown are only those in which at least one RHY program component is required to collect information.

X = data collection is required

? = data collection is determined by how the CoC has structured the coordinated assessment in their area. Placement of the element would be required for any project that is conducting a coordinated assessment. This may be across multiple projects or sited in a central access point or coordinated intake center.

Number	Element	ESG e/e	ESG nbn	Homelessness Prevention	RRH	Street Outreach
4.2	Income and Sources	x		x	x	x
4.3	Non-Cash Benefits	x		x	x	x
4.4	Health Insurance	x		x	x	x
4.5	Physical Disability	x	x	x	x	x
4.6	Developmental Disability	x	x	x	x	x
4.7	Chronic Health Condition	x	x	x	x	x
4.8	HIV/AIDS	x	x	x	x	x
4.9	Mental Health Problem	x	x	x	x	x
4.10	Substance Abuse	x	x	x	x	x
4.11	Domestic Violence	x	x	x	x	x
4.12	Contact		x			x
4.13	Date of Engagement		x			x

4.19	Housing Assessment at Exit	x	x	x	x	x	x	x
4.39	Medical Assistance	x	x	x	x	x	x	X
4.47	T-cell (CD4) and Viral Load	x	x	x	x	x	x	X

2014 Version 5 Updates: 1) Element 4.4 was updated to include "Indian Health Services Program" and "Other" as response options. 2) Element 4.47 response options changed in Field 3 from "yes/no" to "Undetectable", "Not Available" and "Available".

4-6 VA Program Specific Element Visibility – Collection Requirements

The elements shown are only those in which at least one VA program component is required to collect information.

X = data collection is required

#	Element	SSVF	HUD/VASH (and HUD/VASH - OTH
4.2	Income and Sources	x	x
4.3	Non-Cash Benefits	x	x
4.4	Health Insurance	x	x
4.5	Physical Disability		x
4.6	Developmental Disability		x
4.7	Chronic Health Condition		x
4.8	HIV/Aids		x
4.9	Mental Health Problem		x
4.10	Substance Abuse		x
4.11	Domestic Violence		x
4.14 D	Services Provided – SSVF	x	
4.15 B	Financial Assistance – SSVF	x	
4.17	Residential Move-in Date	x (RRH only)	x
4.24	Last Grade Completed	x	x
4.26	Employment Status		x
4.27	General Health Status		x
4.41	Veteran's Information	x	x
4.42	Percent of AMI (SSVF Eligibility)	x	
4.43	Last Permanent Address	x	x
4.45	VAMC Station Number	x	x
4.48	SSVF HP Targeting	x (HP only)	
4.49	Use of Other Crisis Services	x	

2014 Version 5 Updates: SSVF added two new HMIS elements: element 4.48 SSVF HP Targeting Criteria, and Element 4.49 Use of Other Crisis Services was added. SSVF now requires element 4.24 Last Grade Completed (formerly only a RHY element). Data collection requirements for HUD/VASH and HUD/VASH-OTH have been added to facilitate data entry for HUD/VASH-OTH when it is approved.

METADATA ELEMENTS

The term *metadata* is often defined as 'data about data.' Instead of capturing information about a project or a client, Metadata Elements capture information about the data itself: when it was collected, when it was entered into HMIS, who entered it, and which project is responsible for it.

The Metadata Elements are intended to facilitate reporting from HMIS, to simplify the writing of programming specifications, and to provide an audit trail. These elements do not represent an attempt to standardize the way that an HMIS stores data. As long as the HMIS is able to accomplish the purposes identified for the Metadata Elements, the software is not required to use the exact metadata elements listed here. Future programming specifications for reports will reference these Metadata Elements. The Metadata Elements are:

5.1 Date Created

Header	Instruction
Element Name	Date Created
Field 1 & Response	[date field]
Element Type	Metadata
Funder:Program- Component	All Programs – All Components
Project Type Applicability	All
Data Collected About	All Records
Collection Point	Record creation
System Logic	HMIS auto-generated. HMIS must have the ability to identify the date on which a record was first created in HMIS for any client-level data. Data elements that are collected together on a single form may share a single Date Created. HMIS users and system administrators must not have the ability to enter or to modify the information in this Metadata Element.
Other System Issues	The HMIS must store this metadata for all client-level data elements. It is not necessary that this information be displayed in the user interface of the HMIS, but it must be accessible in the programming of reports. Date Created must not change when a data element is edited. If two client records representing the same person are merged, the earliest Date Created must be retained for data elements for which the HMIS stores only one value per client (e.g., name, SSN, date of birth).
XML	XML attribute: DateCreated
CSV	<*><DateCreated> (Field collected across multiple files)
2014 Version 5 Updates	None

5.2 Date Updated

Header	Instruction
Element Name	Date Updated
Field 1 & Response	[date field]
Element Type	Metadata
Funder:Program- Component	All Programs – All Components
Project Type Applicability	All
Data Collected About	All Data Elements
Collection Point	Record add / edit
System Logic	HMIS auto-generated. Created by the HMIS when client-level information is first entered, and updated by the HMIS every time client-level information is saved by an HMIS user.
Other System Issues	The HMIS must be able to determine, for all client-level information, the date on which it was last edited by a user. Each time a user saves data, the HMIS must store the current date as the Date Updated with the data being saved. Data elements that are collected together on a single form may share a single Date Updated. HMIS users or system administrators must not have the ability to enter or to modify the information in this metadata element.
XML	XML attribute: DateUpdated
CSV	<*><DateUpdated> (Field collected across multiple files)
2014 Version 5 Updates	None

5.3 Date Collection Stage

Header	Instruction
Element Name	Data Collection Stage
Field 1 & Response	Data Collection Stage
1	Project entry
2	Project update
5	Project annual assessment
3	Project exit
Element Type	Metadata
Funder: Program-Component	All Programs – All Components
Project Type Applicability	All
Data Collected About	All client level data
Collection Point	Client Data Entry of Specified Elements
System Logic	HMIS auto-generated or HMIS user selected. An HMIS must be able to distinguish between data collected at project entry, project update (during enrollment), and project exit. Data elements that are collected together on a single form may share a single Data Collection Stage. HMIS users should not have the ability to create more than one record per data element at either project entry or project exit (e.g., for a single project stay, a client should have one and only one record of Income and Sources identified as project entry). The system must allow a user to save a dated record for a client's annual assessment as an "annual assessment".

Header	Instruction
Other System Issues	The response categories correlate to response categories defined in the XML and CSV specifications. An "annual assessment" is required as noted in the collection stage for some Program Specific Elements. Elements for which a collection point of 'annual assessment' is required must be collected at least once annually for each client. An Annual Assessment must occur between months 11 and 13 annually for all HUD funded projects. The *Information Date* must be no more than 30 days before or after the anniversary of the client's *Project Entry Date*; information must be accurate as of the *Information Date.* The date range of the Annual Assessment is based entirely around the client's *Project Entry Date*, not on the date of the client's previous assessment. For all projects which require an annual assessments, data collected as part of an annual assessment must have a *Data Collection Stage* of 'annual assessment.' There should be one and only one record for each data element with a *Data Collection Stage* of 'annual assessment' within the 60 day period surrounding the anniversary of the client's *Project Entry Date*. Regardless of whether or not the responses have changed since project entry or the previous annual assessment, a new record must be created for each annual assessment such that it is possible to view a history, by date, of the values for each data element.
XML	XML attribute: DataCollectionStage
CSV	<*><DataCollectionStage> (Field collected across multiple files)
2014 Version 5 Updates	None

5.4 Information Date

Header	Instruction
Element Name	Information Date
Field 1 & Response	[date field]
Element Type	Metadata
Funder: Program-Component	All Programs – All Components
Project Type Applicability	All
Data Collected About	As specified in program specific elements
Collection Point	Client Program-Specific Data Entry
System Logic	This Metadata Element is a hybrid in that it pertains to the client data and not directly to the client, but it will be entered in HMIS by users. Throughout the Data Dictionary this Metadata Element has been added to the data elements where it applies (e.g. Income and Sources, with Response 1 Information Date). The metadata element is included here to provide further information for HMIS vendors and system administrators. Data that is collected only at initial HMIS project entry (e.g., Name, Social Security Number) does not require an Information Date. Data that is collected only at project entry or only at project exit, may be assumed to have an Information Date that matches the Project Entry Date or Project Exit Date, respectively or an HMIS may require that a user specify the date. Data elements that are collected together on a single form may share a single Information Date.

Header	Instruction
Other System Issues	This Metadata Element is applicable to the following Program-Specific Data Elements: • Income and Sources • Non-Cash Benefits • Health Insurance • Physical Disability • Developmental Disability • Chronic Health Condition • HIV/AIDS • Mental Health • Substance Abuse • Domestic Violence • Residential Move In Date
XML	XML attribute: InformationDate
CSV	<*><InformationDate> (Field collected across multiple files)
2014 Version 5 Updates	None

5.5 Project Identifier

Header	Instruction
Element Name	Project Identifier
Field 1 & Response	Project Identifier (2.2) of the project that entered or edited the data
Element Type	Metadata
Funder: Program-Component	All Programs – All Components
Project Type Applicability	All
Data Collected About	Specified data elements
Collection Point	Record add and edit
System Logic	HMIS auto-generated or HMIS user selected. Data elements that are collected together on a single form may share a single Project Identifier. In order to report on data quality on a project's report, it is first necessary to establish that the project in question was responsible for the data.
Other System Issues	This is a basic requirement that assumes a simple relationship between clients and projects. In circumstances where one project may be responsible for entering data that would appropriately appear on another project's required report (e.g., a central intake point), it may be necessary to create a more sophisticated method to establish responsibility for the data entered.
XML	Unique Identifier: ProjectID
CSV	<*><ProjectID> (Field collected across multiple files)
2014 Version 5 Updates	None

5.6 Project Entry ID

Header	Instruction
Element Name	Project Entry ID
Field 1 & Response	A unique project entry identifier used to associate data with a particular period
Element Type	Metadata
Funder: Program-Component	All Programs – All Components
Project Type Applicability	All
Data Collected About	All client level data
Collection Point	Record add
System Logic	HMIS auto-generated. The data element should be created by the HMIS at the time that the record of a project entry is first entered into HMIS, and should be stored with any data that pertains to that particular period of service. Data elements that are collected together on a single form may share a single Project Identifier. An HMIS should be able to correlate data to a specific project stay.
Other System Issues	This metadata element must be stored with the following data elements: • Veteran Status • Disabling Condition • Residence Prior to Program Entry • Housing Status • Project Entry Date • Project Exit Date • Destination • Income and Sources • Non-Cash Benefits • Health Insurance • Physical Disability • Developmental Disability • Chronic Health Condition • HIV/AIDS • Mental Health • Substance Abuse • Domestic Violence
XML	Unique Identifier: ProjectEntryID
CSV	<*><ProjectEntryID> (Field collected across multiple files)
2014 Version 5 Updates	None

5.7 User Identifier

Header	Instruction
Element Name	User ID
Field 1 & Response	A unique ID used to associate data with the user who entered and/or edited it
Element Type	Metadata
Funder:Program- Component	All Programs – All Components
Project Type Applicability	All
Data Collected About	All Records
Collection Point	All Data Entry
System Logic	HMIS generated.

Header	Instruction
	Each authorized user of an HMIS must have a unique identifier stored in the HMIS. Every time data are entered or edited in HMIS, the HMIS must keep a record of which user entered or edited the data based on the credentials supplied at the time of login. The data element should be stored with any Universal or Program-Specific Data Element entered or edited in an HMIS.
Other System Issues	It must be possible to determine, for all client-level data, which user entered it in HMIS. Each time a user saves data, the HMIS must store the User Identifier of that particular user with the data being saved. Data elements that are collected together on a single form may share a single User Identifier. HMIS users must not have the ability to enter or to modify the information in this Metadata Element. If a data element is edited, the system must retain the original value, along with the User Identifier of the user who entered it, in addition to storing the new value and the User Identifier of the editing user.
XML	XML attribute: UserID
CSV	<*><UserID> (Field collected across multiple files)
2014 Version 5 Updates	None

METADATA ELEMENT TABLE SUMMARY

Data elements collected on a single form / stored as fields in one record of a table may share a single set of metadata.
*Associated with project entry; the information date is the entry date.
†Associated with project exit; the information date is the exit date.

Number	Element	Date Created	Date Updated	Data Collection Stage	Information Date	Project ID	Project Entry ID	User ID
3.1	Name	x	x					x
3.2	Social Security Number	x	x					x
